Manuals

MB hasn't sold paper or CD service manual for some years now. instead, your option is to go online and pay by subscription for access time:

<http://www.startekinfo.com/StarTek/>

here is one nice group of semi technical information free which will give you insight to the 210 design and operation.

<http://www.mercedestechstore.com/w210.htm>

one guy has hosted the above CD here

<http://bayhas.com/mercedes/w210/contents/>

here is another CD offering for about \$10 but they're having manufacturing bugs and the disks which have been sent out the past 4-6 months have not been loading properly. I have a working copy and it is quite a fabulous gather of tech sheets and data from MBUSA, drawn from the MB online service site.

Problematic issues

SRS sensor in front passenger seat fails

Air conditioning failure, uneven cooling

Poor Smartkey remote distance

Poor design in taillight circuit

Brake light sensor premature failure

Cruise control sensitive to uneven tire match

Shifter very susceptible to liquid intrusion

Steering column squeaking

PSE pump located in easily flooded

Fuses beneath rear seat located in easily flooded location

Pixels disappearing on instrument cluster messaging window

Cracks in the dashboard surrounding the airbag

Sunroof may get jammed if not maintained/lubricated

Seat heating element may crack and fail

Premature failing of the rear window regulator

Sometimes folks encounter hard downshift from gear 2 to gear 1

Premature failing of the electrical, door pin switch (controls cabin lights)
