Only available on Standard on the 197 (197 of 197 and 197 of 197)

- The AMG Active Rear Wheel Steering system improves handling by adjusting the angle of the rear wheels, and adjusting the angle of the front wheels. The AMG Active Rear Wheel Steering system is standard on all models.
- At low speeds it turns the rear wheels in the opposite direction of the front wheels, which reduces the turning circle. At high speeds it turns the rear wheels in the same direction as the front wheels, which improves handling and stability. The rear wheels turn up to 2.5 degrees.
- A separate electric motor with its own electronic control unit controls the rear wheel steering. The AMG Active Rear Wheel Steering system integrates the rear wheel steering with the AMG Active Ride Control suspension, the AMG Dynamic Select, the AMG Dynamic Handling, the AMG Dynamic Stability Control, the AMG Dynamic Engine Control, and the AMG Dynamic Transmission Control.
- The AMG Active Rear Wheel Steering system is standard on all models.
- The AMG Active Rear Wheel Steering system is not available with Sport Suspension (1MA).
