Completely new bodyshell

The new S-Class Coupe is based on the new S-Class Sedan. Its bodyshell is made of high-strength steel and aluminium. Aluminium components have been used for the front and rear wings, the bonnet, the doors, the boot lid and the rear bumper. The new bodyshell is characterised by a very low coefficient of drag (0.24 for the S 500 4MATIC Coupe) and by very good crash properties. The new S-Class Coupe is also equipped with a new generation of the Mercedes-Benz Active Body Control (ABC) suspension system. This system is based on a hydraulic actuation of the suspension and anti-roll bars. The system is characterised by very good ride comfort and very good handling properties. The new S-Class Coupe is also equipped with the Dynamic Handling Package. This package includes the Dynamic Handling Control (DHC) function, which is a combination of the Electronic Stability Program (ESP) and the Active Body Control (ABC) system. Handcrafted AMG 2.0L Four-Cylinder Turbocharged Engine

For over a decade, AMG has exclusively manufactured 32-valve engines known as one-by-one, artisan-crafted powerhouses. Now, the same exceptional craftsmanship that goes into the 6.3-liter V8 and 6.0-liter V12 engines is applied to the new 2.0-liter four-cylinder engine, which is also completely unique. The engine is the first in a series of new AMG powertrains that will be introduced in the coming years. The engine is characterized by very good power and very good fuel economy
