

P32.20-2033-06

- 11 Suspension strut
- 11a Nut
- 11b Positioning washer
- 11c Suspension strut bearing

11f Protective cover

- 11h Rubber stopper
- 11i Washer
- 12 Spring

P32.25-2123-09

- a Highest point of suspension strut mount
- b Fastening shackle

	Removing		
<u> </u>	toppling off of the lifting platform.	Align vehicle between columns of vehicle lift and position four support plates at vehicle lift support points specified by vehicle manufacturer.	

⚠ Danger!	Risk of injury caused by pinching or	Use only approved tensioning devices; shield	AS00.00-Z-0001-01A
	crushing when working on springs or spring bodies that are under load	off hazard area if necessary. Inspect special tools for damage and proper	
		operation (visual inspection).	
		Wear protective gloves.	
1	Remove front spring strut (11)		AR32.25-P-1017P
*	Disassemble		
2	Clamp spring compressor in a vise and	<u>S</u>	*203589013100
	install clamping plates	3	*203589016300
3	Install suspension strut (11) in spring	i Attach clamping plates so that at least	
	compressor	three windings of the spring (12) are tensioned.	
4	Clamp spring (12) until the upper spring cup is relieved of load	i Observe correct installation position.	
5	Unscrew nut (11a)	Model 203	
		i Counterhold piston rod (11g) using Allen	
		wrench S	*203589000700
6	Remove suspension strut bearing (11c)		
7	Remove suspension strut (11)		
8	Release spring compressor and remove spring (12) and upper spring cup	i Before removing, mark the spring (12) with a chalk line (arrow).	
9	Check suspension strut (11)	L Check suspension strut insert for leaks. A light oil film on the suspension strut insert is permissible. Dispose of suspension strut (11) in the event	AR32.25-P-0121A
⊯ os		of more severe leakage: See dispose of shock absorber.	OS32.25-P-0121-01GC
, "	Assemble		
10	Insert tensioning device	i Insert the clamping plates so that at least	
		three windings of the spring (12) are clamped.	
11	Tension spring (12)		
12	Insert suspension strut insert		
13	Fit suspension strut bearing (11c) on upper spring cup	i Mount suspension strut bearing (11c) so that the highest point (a) of the suspension strut bearing (11c) lies on an imaginary line with the outer end of the mounting bracket (b).	
14	Attach and tighten nut (11a)	i Counterhold piston rod (11g) using Allen wrench Mm Model 203	*BA32.25-P-1009-01B
		Model 203 Mm Model 209	*BA32.25-P-1004-01E
15	Release spring (12) and remove spring strut (11) from spring compressor		
X	Install		
16	Install front strut assembly (11)		AR32.25-P-1017P
17	Perform a wheel alignment check	i Only necessary after accident repairs.	AR40.20-P-0200P
