Seat Belt Does Not Roll Up Correctly

If you receive customer reports in the above model vehicles of the front or rear seat belts not rolling up fully, the cause could be dirt deposits on the seat belt guide due to a soiled seat belt. Cleaning the belt guide and seat belt should restore proper function of the seat belt retraction.

To resolve, perform the following.

Figure 1
Area of belt guide to be cleaned

Figure 2
Deposits on belt guide

1. Clean the belt guide using MB Plastic Cleaner (Figures 1 and 2).
2. Clean the seat belts using MB Car Shampoo mixed with water, MB Textile Carpet/Fabric Care or clean, lukewarm water and soap. Do not treat the belt with any other cleaning agents.
3. Extend belt and allow to air dry. Do not dry at temperatures above 175°F (80°C) or in direct sunlight. Do not bleach or dye.

Note:

If these instructions are not followed, proper retraction of the seat belt may be impaired.

Note:

This repair cannot be claimed under warranty.

Qty.	Part Name	Part Number
1	MB Plastic Cleaner	A001 986 94 71
1	MB Car Shampoo	A001 986 41 71 10
