AMG – passion and safety combined

Let's face it: one of the aims of sports accessories is to quicken the heartbeat. But for total enjoyment you need the assurance that the technology's right too.

This is true even of light-alloy wheels, which many people wrongly assume are designed merely for visual impact. Like so many things in automotive engineering, light-alloy wheels have their origins in the motor racing world. When every second counts, materials need to be light, strong and totally reliable. All of our light-alloy wheels are specifically

developed and produced for the individual model series. And they undergo stringent laboratory testing and they are tested on the road to ensure their suitability. All of which produces significant safety benefits.

The AMG rear silencers, which are optimally tailored to the relevant powerplants, offer safety for your engine while of course providing a distinctive look and incomparable sound, underlining the sporty nature of your Mercedes.

It's good to know you can keep your passion under control.

If you can't beat the wind, join forces with it

There are certain things you can't avoid – and a headwind is one of them. But you can use it to your advantage if you take the right approach.

That is why the issue of aerodynamic drag is always given so much attention at Mercedes-AMG. It is not just designers who work on our front and rear aprons, our side skirts and rear spoiler lips. First and foremost, we call upon our engineers, who use wind tunnels to find out how to make the best use of the airflow. Then there are our experienced drivers, who test the practical benefits of AMG bodystyling under real driving conditions.

The idea is to minimise aerodynamic lift, especially at high speeds, so that your Mercedes hugs the road in all driving situations. But the benefits don't stop there: AMG bodystyling also ensures optimum airflow to the engine and brakes.

Of course, all of the AMG bodystyling elements have to blend unobtrusively with the design of the particular Mercedes model concerned. A sporting challenge which we are happy to meet.

There are many ways to stand out from the crowd. Why not try the professional approach?

The ear-splitting scream of racing engines, the smell of petrol and rubber pervading the air, hard labour against the clock, a constant striving for perfection – our work is driven by passion, commitment and enthusiasm.

Our workplace: the world's racing circuits – an unforgiving environment that challenges engineers and aerodynamics experts to prove they have done their homework properly. Theory is fine – but the real thrill comes from achieving success in practice.

Now you can share in that pleasure: with chassis components and bodystyling elements custom-designed by our experts for your Mercedes. You can indulge your passion for sporty driving without compromising safety or quality.

Mercedes-AMG: uncompromising, committed, dynamic. Hand-built components that are far more than just decorative. We take a professional approach – you'll enjoy the difference.

¹ Additional work required for installation on models from 03/06. Please contact your Mercedes-Benz dealer for details

² For vehicles from VIN "...1F030778" only

³ Not for SL 65 AMG

⁴ Modifications required

Please contact your Mercedes-Benz dealer for advice, sales and equipment installation

Please note: changes may have been made to the product since this brochure went to press (31.5.2007). The manufacturer reserves the right to make changes to the design, form, colour and specification during the delivery period, provided these changes, while taking into account the interests of the vendor, can be deemed reasonable with respect to the purchaser. Where the vendor or the manufacturer uses symbols or numbers to describe an order or the subject of an order, no rights may be derived solely from these. The illustrations may show accessories and items of optional equipment which are not part of standard specification. Colours may differ slightly from those shown in the brochure, owing to the limitations of the printing process. This brochure has been compiled by DaimlerChrysler AG of Germany and is distributed internationally. It provides a general indication of the range of models, features, optional extras and/or colours available in various countries. Some of the models, features, optional extras and/or colours shown may not be available in your country or may only be available in a different specification. Additionally some models, features, optional extras and/or colours may only be available in combination with others. For current and more specific information in relation to the range of models, features, optional extras and/or colours available in your country, and their pricing, you should contact your nearest authorised
