From: <http://www.fr.michelin.ca/CA/en/tires/products/x-ice-xi3.html>

Since the wheels are all-black, the C43's centre-caps are silver (and the fitment was "unknown"), I ordered some black-motif centre-caps for the wheels also -- it added \$120 CAD to the order total. Interestingly, the delivered caps were actually Mercedes parts.

From apa.ca:

Bridgestone

Blizzak WS 80

Price: \$197

Bridgestone introduced the Blizzak line in the 1990s, the first tire to feature a special rubber compound that dramatically improved performance on ice. The WS 80 is the sixth generation of the Blizzak concept. Directional tire, optimized for snow and ice; compared to the WS 70 which this tire supercedes, the tread is a bit shallower and less aggressive, and provides improved braking on ice and better dry road performance. The WS 80 likely still offers better traction in slush than the Michelin X-Ice. Soft riding. Very good overall performance and predictability; a very good choice for severe conditions. Bridgestone reduced prices in Canada last year, and they are now slightly lower than Michelin. [Mail-in rebate when you buy four tires.](#)

From apa.ca:

Michelin

X-Ice Xi3

Price: \$215

Among Consumer Reports' preferred tires in testing because of its superior performance on wet and dry roads, and ride comfort. Optimized for ice and snow, this tire was among the favorites with tire dealers surveyed. Some consumers using the previous version of this tire reported that traction in slush was unimpressive, and that the shallow, conservative tread limits its traction in deep snow. Best-in-class performance on pavement. Quiet. Long wearing. Tricky mileage warranty requires the tires to be virtual banana peels before you can collect. [Mail-in rebate when you buy four tires.](#)

From Car and Driver magazine's testing:
