

Rockett Brand 100 Racing Gasoline is a high quality unleaded gasoline designed especially for the performance enthusiast who wants a high octane fuel. It is suitable for both racing purposes and high performance street vehicles. It will not harm catalytic converters or affect the oxygen sensors. It has an octane rating (AKI) of 100 and can be used in engines with compression ratios up to 14 to 1 with aluminum heads and 13 to 1 with cast iron heads.⁽¹⁾

Drag strip testing of this gasoline has shown improvements of 4 mph and 0.5 seconds when compared to 92 octane gasoline in a turbocharged V6 powered vehicle.

Rockett Brand 100 Racing Gasoline meets all State and Federal requirements for CARB Phase III and EPA reformulated gasoline (RFG). This product is legal for sale and use in all fifty states.

TYPICAL APPLICATIONS

- ◆ Classic & Modern Muscle Cars
- ◆ Sports Cars
- ◆ High End Luxury Cars
- ◆ Turbocharged Cars
- ◆ Marine Engines
- ◆ Performance Motorcycles
- ◆ Import Drag Racing

MEETS REQUIREMENTS:

ASTM D4814 Standard Specification for Automotive Spark-Ignition Engine Fuel, Volatility Class A or B
CARB Phase III Reformulated Gasoline
EPA Reformulated Gasoline

OUTSTANDING FEATURES

- ◆ 100 AKI Octane Number
- ◆ Contains no lead or metallic additives⁽¹⁾
- ◆ Low vapor pressure for protection against vapor lock
- ◆ Controlled mid-range volatility for excellent warmup, acceleration, & driveability
- ◆ Cleans up dirty carburetors and fuel injectors, resists gum formation, burns clean
- ◆ Controlled composition & reproducible quality permits precise engine tuning for maximum performance
- ◆ Oxidation and corrosion inhibited for longer shelf life

(1) Caution: Premature failure of valve seats can occur in some older model cars and trucks running under high load conditions for extended periods with unleaded gasoline. Use of a valve recession additive is recommended in the absence of hardened valve seats.

DESCRIPTION

Rockett Brand 100 Racing Gasoline is formulated from high octane gasoline blend stocks and selected additives. It is highly resistant to detonation. Its low vapor pressure quality provides protection against vapor lock. Mid-range volatility is carefully controlled to give excellent warm-up, acceleration, and driveability. The composition of this fuel is carefully controlled to deliver consistent, reproducible quality, allowing precise engine tuning for maximum performance.

Rockett Brand 100 Racing Gasoline burns clean, leaves little or no deposits, and allows maximum engine power to be developed. The high quality stocks used in this gasoline make it very stable and resistant to gum formation. A multifunctional additive package cleans up dirty carburetors & fuel injectors, and keeps intake valves clean. Antioxidants and corrosion inhibitors promote stability and longer shelf life. This gasoline does not contain any metallic additives.

TYPICAL INSPECTION TESTS:

Product Code.....	100E
Density, g/cm ³ @ 60°F.....	0.744
Gravity, °API.....	58.7
Color.....	Blue
Di-Electric Constant.....	+10.5
Octane Number, AKI, (R+M)/2.....	100
