Installation Instructions for

MERCEDES-BENZ EWA net

This system is a professional application as used in all Mercedes Dealers. You will have the same access to that information with the installation of this software.

Installation Instructions

Pre Installation tasks

Minimum Requirements: PC with at least Windows NT 4.0 – I Recommend a Fresh Clean Installation of Windows before you install this software. The hard drive partition which you want Mercedes to install has to be formatted with NTFS, And I recommend that you keep this as your Local C:\ drive. For complete set you need about 25Gb of free disk space. Disable Antivirus & Spyware Software Log In as Administrator Run the Install application as Administrator by right clicking on it and selecting run as Administrator Your DVD drive Must Support Dual Layer DVDs as WIS 2 & EPC 2/3 will not install if it does not. Make sure that you have the latest firmware installed as this may correct this. <u>VISTA USERS</u>

Disable user access control in Control Panel/User Accounts

1. Open the contents of the disk.

26. After the finish of the installation to run the EPC you should enter in the menu Start, in "Programs" - folder "EWA net" and run the page "EWA net". On the right you should select the section "Programs" and run the "EPC net". Again vista users access the program by inputting http://localhost:9000/ in your web browser instead.

The WIS net base is installed in the same way as from the paragraph 24, you should just select the chapter WIS net. The launching is also similar.

Any issues its ebay messages only for support. And please don't forget the feedback. 5 stars please if your happy. Thanks
