## AMG Track Pace App for Apple iPhone® (256)

### AMG Track Pace App for Apple iPhone® (256)

Standard on All Models

With the "AMG Track Pace" app, a smartphone can be turned into a personal racing engineer. This enables lap/sector times or even videos to be recorded and analyzed. Another attractive feature is the option to exchange data with other AMG drivers e.g. via social networks.

Overview of the AMG Track Pace app:

- Stores vehicle-specific data (e.g. speed, acceleration) as well as lap and sector times
- Video recordings via smartphone/GoPro are also possible
- Driving ability can be analyzed and improved in a targeted manner
- Connection via WLAN
- Exchange data with other AMG drivers via social networks such as Facebook (Share function) or the AMG Private Lounge

## *Sound Systems*

### **Loudspeaker – 4**

*Standard on GT & GTR*

- 100 W output
- Tone controls (bass, treble, fader, balance)
- Separate audio/telephone volume control
- Lowest weight of all available sound systems

## Handcrafted AMG 4.0L V8 Biturbo engine (M178)

### Handcrafted AMG 4.0-Liter V8 Biturbo engine (M178)

#### Standard

The newly developed AMG 4.0-litre V8 Biturbo engine in the Mercedes-AMG GT combines outstanding performance with ideal weight distribution. It is installed as a front mid-engine behind the front axle and connected to the transmission at the rear axle via the torque tube in a transaxle configuration. The presence of a dry sump lubrication system furthermore results in a significant lowering of the vehicle's center of gravity and greater lateral acceleration.

The most important performance data:

#### GT

- **Output:**  
469 hp @ 6,000 rpm  
465 lb/ft @ 1,700-5,000rpm
- **Technical Features:**  
Dry Sump Lubrication
- **0-60mph:**  
3.9 sec
- **Top Speed:**  
189 mph (electronically limited)

#### GTS

- **Output:**  
515 hp @ 6,000 rpm  
494 lb/ft @ 1,750-5,000 rpm
- **Technical Features:**  
Dry Sump Lubrication
- **0-60mph:**  
3.7 sec
- **Top Speed:**  
193 mph (electronically limited)

#### GTC

- **Output:**  
550 hp @ 5,750 - 6,250 rpm  
502 lb/ft @ 1,900-5,500 rpm
- **Technical Features:**  
Dry Sump Lubrication
- **0-60mph:**  
3.6 sec
- **Top Speed:**  
196 mph (electronically limited)

#### GTR

- **Output:**  
577 hp @ 6,250 rpm  
516 lb/ft @ 1,900-5,500 rpm
- **Technical Features:**  
Dry Sump Lubrication
- **0-60mph:**  
3.5 sec
- **Top Speed:**  
198 mph (electronically limited)

## AMG SPEEDSHIFT® DCT 7-speed transmission

### AMG SPEEDSHIFT® DCT 7-speed transmission

#### Standard

Connected to the engine through the Carbon Fiber driveshaft, itself weighing less than 9lbs., this Dual-clutch transmission boasts spontaneous gear changing and extremely short shift times. 7 gears, 3 or 4\* automatic modes, one manual mode plus double declutching and RACE START\* functions allow exceptionally dynamic acceleration.

- 3 modes selectable using the AMG DYNAMIC SELECT Controller
- Momentary Manual mode: Change to "M" by actuating the shift paddles, will resume to automatic mode after 10 seconds
- When calling on Momentary Manual mode, holding the downshift paddle will place the car in an "optimized downshift" gear, while holding the upshift paddle will place in "highest possible" gear
- The Transaxle transmission is paired to two types of limited-slip differentials, depending on model - with GT featuring a mechanically-actuated version and GT S featuring an electronically-actuated version with faster detection of variance of wheel speeds
- Partial ignition interruption during upshifts and automatic double-declutching function when downshifting, for emotional exhaust note
- Able to perform 7-3 and 5-2 downshifts cycles when throttle is called upon, with less than 100ms shifts in Sport Plus "S+" and "RACE" modes
- ECO start/stop function and sailing mode in "C" mode

## *AMG Sport Suspension*

### **AMG Sport Suspension**

*Standard on GT (GT only)*

The AMG Sport Suspension delivers impressive roadholding performance thanks to implementation of a double-wishbone design that has proved so successful in AMG motorsports.

Due to this double-wishbone design, the wheel location and suspension functions are entirely separate. Therefore, the driver benefits from stable and harmonious handling performance, even at the limits, thanks to a high level of camber and enough damping in the suspension for quick reflexes in a track setting.

- All 4 wheels are located on double wishbone suspension, with separate control of wheels and springs
- High level of camber and track rigidity: Ensures more precise wheel location and more communicative road feel at the handling limit
- For even more precise roadholding, the spring/damper struts on the rear axle are directly connected to the hub carrier
- Wishbones, steering knuckles and hub carriers made of forged aluminum reduce unsprung weight

## AMG RIDE CONTROL Sport Suspension w/ Variable 3-stage Damping

### **AMG RIDE CONTROL Sport Suspension**

*Optional on GT, Standard on GTS, GT C & GTR*

The AMG 3-stage Adaptive Sport Suspension with adaptive adjustable damping provides three different driver-selectable suspension modes. The driver is able to choose between "Comfort", "Sport" and "Sport Plus" at the touch of a button on the center console or by selecting the mode on AMG DYNAMIC SELECT, optimizing the damping characteristics for the current driving situation – from highly comfortable for cruising to sporty for cornering at speed.

The suspension also delivers impressive racetrack performance thanks to implementation of a double-wishbone design that has proved so successful in AMG motorsports.

3 suspension levels: "Comfort", "Sport", "Sport Plus", manually adjustable or selectable by selecting the mode with the AMG DYNAMIC SELECT Controller

Continuously operating damping system enhances driving safety and provides excellent lateral dynamics and driving stability at high speeds.

Damping tuning is controlled individually for each wheel and is dependent on the driving style, the road surface condition and the selected suspension setting.
