# General Information

## Important Note

The information presented in this guide is based on the most current information available and is intended for internal use only. Mercedes-Benz reserves the right to make changes at any time, without notice, to colors, materials, equipment, special specifications and models.

Pricing may not yet be finalized for some models or options.

Due to variances among monitors and printers the colors that appear on your screen and printouts may not be exact.

For illustrative purposes, some images may show vehicles with European Specification.

# Specifications

## AMG-GT55C4

### Chassis

#### Chassis and Body Construction

Aluminum space frame; intelligent material mix of aluminum, steel, magnesium and fiber composites throughout the vehicle

#### Vehicle Type

Two-door Coupe

### Suspension

#### Front Suspension

AMG ACTIVE RIDE CONTROL suspension with semi-active anti-roll stabilization, aluminum double wishbones, anti-dive control, coil springs and adaptive adjustable damping

#### Rear Suspension

AMG ACTIVE RIDE CONTROL suspension with semi-active anti-roll stabilization, aluminum double wishbones, anti-dive control, coil springs and adaptive adjustable damping

### Drivetrain

#### Transmission

AMG SPEEDSHIFT MCT 9G (9 speed)

#### Drive Configuration

AMG Performance 4MATIC+ all-wheel drive with variable torque distribution

### Wheels and Tires

#### Standard Wheel Size

Front: 10.5" x 20" / Rear: 11" x 20"

#### Standard Tire Size

Front: 295/30 R 20 / Rear: 305/30 R 20

#### Standard Wheel Offset (mm)

Front: ET 42 / Rear: ET 33

### Brakes

#### Front Brakes

15.4" composite brake discs, vented and perforated; 6-piston aluminum fixed caliper

#### Rear Brakes

14.2" composite brake discs, vented and perforated; 1-piston aluminum floating caliper

### Engine

#### Engine Configuration

Handcrafted AMG 4.0L V8 biturbo

#### Displacement (cc)

3,982

#### Bore (in / mm)

3.27 / 83.0

#### Stroke (in / mm)

3.62 / 92.0

#### Compression Ratio

8.6 : 1

#### Power (hp)

469 hp @ 5,500 - 6,500

#### Torque (lb-ft)

516 lb-ft @ 2,500 - 5,000

#### Fuel Requirement (Octane)

91

#### Fuel Tank Size (gallons)

18.5

#### Redline (rpm)

7,000

### Performance

#### Acceleration 0-60 mph (sec)

3.8 (est)

#### Top Speed (mph)

183 (est)

### Fuel Economy

#### City Fuel Economy (mpg)

13

#### Highway Fuel Economy (mpg)

20

#### Combined Fuel Economy (mpg)

16

#### Gas Guzzler Tax

\$1,700

### Exterior Dimensions

#### Vehicle Length (in.)

186

#### Vehicle Height (in.)

53.3

#### Vehicle Width w/o exterior mirrors (in.)

79.3

#### Wheelbase (in.)

106.3

#### Curb Weight (lbs)

77.6

#### Track Width Front/Rear (in.)

66.3 / 66.4

### Interior Dimensions

#### Cargo Capacity

11.3 cu. ft. : w/ Rear Seats folded down - 23.8 cu. ft.

*Chassis*

**Chassis and Body Construction** Aluminum space frame; intelligent material mix of aluminum, steel, magnesium and fiber composites throughout the vehicle

**Vehicle Type** Two-door Coupe

*Suspension*

**Front Suspension** AMG ACTIVE RIDE CONTROL suspension with semi-active anti-roll stabilization, aluminum double wishbones, anti-dive control, coil springs and adaptive adjustable damping

**Rear Suspension** AMG ACTIVE RIDE CONTROL suspension with semi-active anti-roll stabilization, aluminum double wishbones, anti-dive control, coil springs and adaptive adjustable damping

*Drivetrain*

**Transmission** AMG SPEEDSHIFT MCT 9G (9 speed)

**Drive Configuration** AMG Performance 4MATIC+ all-wheel drive with variable torque distribution

*Wheels and Tires*

**Standard Wheel Size** Front: 10.5" x 20" / Rear: 11" x 20"

**Standard Tire Size** Front: 295/30 R 20 / Rear: 305/30 R 20

**Standard Wheel Offset (mm)** Front: ET 42 / Rear: ET 33

*Brakes*

**Front Brakes** 15.4" composite brake discs, vented and perforated; 6-piston aluminum fixed caliper

**Rear Brakes** 14.2" composite brake discs, vented and perforated; 1-piston aluminum floating caliper

*Engine*

**Engine Configuration** Handcrafted AMG 4.0L V8 biturbo

**Displacement (cc)** 3,982

**Bore (in / mm)** 3.27 / 83.0

**Stroke (in / mm)** 3.62 / 92.0

**Compression Ratio** 8.6 : 1

**Power (hp)** 577 hp @ 5,500 - 6,500

**Torque (lb-ft)** 590 lb-ft @ 2,500 - 5,000

**Fuel Requirement (Octane)** 91

**Fuel Tank Size (gallons)** 18.5

**Redline (rpm)** 7,000

*Performance*

**Acceleration 0-60 mph (sec)** 3.1 (est)

**Top Speed (mph)** 196 (est)

*Fuel Economy*

**City Fuel Economy (mpg)** 13

**Highway Fuel Economy (mpg)** 20

**Gas Guzzler Tax** \$1,700

*Exterior Dimensions*

**Vehicle Length (in.)** 186

**Vehicle Height (in.)** 53.3

**Vehicle Width w/o exterior mirrors (in.)** 79.3

**Wheelbase (in.)** 106.3

**Curb Weight (lbs)** 4343

**Track Width Front/Rear (in.)** 66.3 / 66.4

*Interior Dimensions*

**Cargo Capacity** 11.3 cu. ft. : w/ Rear Seats folded down - 23.8 cu. ft.

## Options In Detail

### Completely new bodyshell

The sophisticated bodyshell of the new AMG GT is the basis for high performance and driving comfort. A sibling frame to that of the new SL (R 232), it also relies on an intelligent material mix of an aluminum spaceframe architecture together with high-strength steels and magnesium. One example of intelligent use of materials is the greenhouse of the new GT, where it is structurally designed with lightweight and high-strength steel to meet the high safety requirements at Mercedes-Benz, without sacrificing performance.

Due to the high stability of steel, less material can be used resulting in a lower weight. In addition, further local stiffening measures come into play, for example the GT's closed coupé frame was adapted to further increase torsional stiffness (+ approx. 40 % compared with the SL) to prevent twisting of the frame when driving.

### Handcrafted AMG 4.0L V8 Biturbo Engine

For use in the GT, the internally named M 177 engine received a new oil pan, repositioned intercoolers and active crankcase ventilation. The intake and exhaust ducts have been optimized for even more effective gas exchange and the exhaust gas routing for the catalytic converter box and petrol particulate filter has been enlarged. The developers achieved the increased output of the GT 63 primarily through higher boost pressure and greater air flow, as well as modified engine software. To sum up, the eight-cylinder engine thrills with its exceptional power delivery and powerful acceleration in all engine speed ranges combined with maximum efficiency for low consumption and emission values.

In the GT 55, the engine produces 469 hp and provides a maximum 516 lb-ft of torque over a range of 5,500 to 6,500 rpm. At a standstill the vehicle is able to reach 60 mph in an estimated 3.8 seconds.

The engine in the GT 63 develops 577 hp and provides a maximum torque of 590 lb-ft over a wide rev range from 5,500 to 6,500 rpm. The 2-door coupé's top engine thus conveys effortless superiority in every rev range. The acceleration from 0 to 60 mph in an estimated 3.1 seconds illustrates this.

### AMG SPEEDSHIFT MCT 9G transmission

The AMG SPEEDSHIFT MCT 9G transmission (MCT = Multi-Clutch Transmission) is specially adapted to the requirements of the new GT. A wet start-off clutch replaces the torque converter. It reduces weight and, thanks to its lower inertia, optimizes response to accelerator pedal commands, especially during spurts and load changes. The elaborately calibrated software ensures extremely short shift times and, if required, fast multiple downshifts and, thanks to the throttle blip function in the "Sport" and "Sport+" driving modes, delivers a particularly emotionally appealing gearshift experience. Here, defined ignition adjustments enable even faster gearshifts than in the other modes. In all modes moving off occurs in first gear in order to always guarantee a dynamic driving experience. There is also the RACE START function which ensures optimal acceleration from a standstill.

The highlights of the transmission include:

- Adaptation of the shift characteristics to the selected AMG DYNAMIC SELECT driving mode
- In manual mode "M," the transmission responds immediately and precisely to manual gearshift commands from the driver and implements the commands at lightning speed
- Automatic throttle blipping function when downshifting: This effect is automatically active in the "Sport", "Sport+" and "RACE" driving modes (standard on the GT 63)
- ECO start/stop function is automatically active in the "Comfort" driving mode
- The "gliding" mode can be activated in the "Individual" driving mode

### AMG Performance 4MATIC+

Standard on GT55 & GT63

For the first time the GT 2-door is available with a drive system acting on all four wheels. The model is equipped with AMG Performance 4MATIC+ fully variable all-wheel drive as standard. This intelligent system combines the advantages of different drive concepts: the fully variable torque distribution to the front and rear axles ensures optimal traction right up to the physical limit. The driver is also able to rely on high handling stability and a high level of safety under all conditions: in the dry, in the wet or in snow. The transition from rear-wheel to all-wheel drive and vice versa takes place continuously on the basis of a sophisticated matrix that integrates the intelligent control into the entire vehicle systems architecture.

An electromechanically controlled clutch connects the permanently driven rear axle variably to the front axle. The best possible torque split is continuously computed according to the driving conditions and driver's input. This means that the new roadster can be driven continuously variably from traction-oriented all-wheel drive to pure rear-wheel drive. Alongside traction and lateral dynamics, the all-wheel drive also improves the longitudinal dynamics for even more powerful acceleration.

### AMG DYNAMIC PLUS Package

Standard on the GT 55 and GT 63

The AMG DYNAMIC PLUS Package, designed for the ultimate driving enjoyment and supreme agility. It combines numerous high-performance components in an attractive package for further improved driving dynamics.

From visible distinction in the form of yellow-painted AMG brake callipers to experiential with the unique RACE drive program featuring drift mode. Additional components include an electronically controlled AMG limited-slip differential on the rear axle, dynamic engine mounts, and a 10mm lowered suspension, all set with the purpose to provide the most thrilling driving experience.

- AMG brake callipers painted in yellow (U69)
- "RACE" drive program including Drift mode
- AMG dynamic engine mounts (466)
- AMG rear axle locking differential, electronic (467)
- Suspension lowered by 10 mm

### Rear-axle Steering

Standard on GT 55 & GT 63

For the first time, the GT is equipped with 2.5 degree active rear-axle steering as standard. Depending on the speed, the rear wheels steer either in the opposite direction (up to 62 mph, or 100 km/h) or in the same direction (faster than 62 mph, or 100 km/h) as the front wheels. The system thus enables both agile and stable handling - characteristics that are in contrast to each other without rear-axle steering. Other advantages include easier vehicle control at the limits and less steering effort because the front-wheel steering ratio is more direct.

### Standard Active Aerodynamic Elements

A technical highlight in the aero development: the active air control system AIRPANEL. AIRPANEL features vertical louvers hidden behind the lower air intake in the front bumper. Normally the louvers are closed, this position reduces drag and allows the air to be directed specifically towards the underbody and also reduces front lift. Only when certain temperatures on predefined components are reached and the demand for cooling air is particularly high do the louvers open and allow maximum cooling air to flow to the heat exchangers.

Another active component is the retractable rear spoiler seamlessly integrated into the trunk lid. It changes its position depending on the driving status. In doing so, the control software takes into account numerous parameters: it factors the driving speed, the longitudinal and lateral acceleration and the steering speed into the calculation. The spoiler assumes five different angular positions from 50 mph (80 km/h) to either optimize handling stability or reduce drag.

Exclusively Standard on the GT 55 & GT 63 is also an active aerodynamic element which is hidden in the underbody in front of the engine, and also contributes to the improved handling. This carbon profile, which weighs around 12 pounds (5.5 kilograms), reacts to the setting of the AMG driving modes and automatically extends downwards by around 1.6 inches (40 mm) at a speed of 50 mph (80 km/h). This creates a Venturi effect, which sucks the car to the road surface and reduces front-axle lift. The driver feels this positively in the steering: the GT can be steered even more precisely into bends and tracks even more stably.

### AMG Aerodynamics Package (DC3)

Get the most out of your vehicle with the AMG Aerodynamics Package, you can specifically sharpen the looks while benefiting from improved driving characteristics. This package consists of a function fixed rear wing that generates additional downforce on the rear axle (+31 lbs at 155mph / 48.5 lbs at 195mph) for better performance.

*Currently Delayed Feature* - When equipped with Carbon Fiber Exterior Package, Fixed Rear Spoiler will be in Carbon Fiber

- Front apron with flaps on the air intakes and wheel arches in high-gloss black
- Rear apron with flaps on the side air outlets in high-gloss black
- Diffuser attachment at the rear in high-gloss black

### AMG Carbon Fiber Package (DC4)

The AMG Carbon Fiber package allows the customer to make the GT even more dynamic. The package includes the following parts in carbon: **front splitter**, **inserts in the side sills**, **the exterior mirror housings**, **diffuser** as well as the blade of the **static rear wing** (in conjunction with AMG Aerodynamics package). In addition, the tailpipe trims are black chrome-plated and the roof edge trim bar and the trim element of the wings are in high-gloss black.

### P82 GUARD 360

GUARD 360 vehicle protection provides all-round monitoring. It comprises an anti-theft alarm system plus tow-away protection that is able to detect changes in position. Movement in the vehicle interior also triggers visual and acoustic warnings. After-theft help also increases the chances of you recovering your property.

- Parking damage detection
- Theft/towing notification
- Camera Snapshots in headunit and app icw w. 360° Surroundview Camera
