## Driver Assistance Package

### Driver Assistance Package (997)

Option price: \$2,250

- **Active Distance Assist DISTRONIC®** is able to follow a vehicle in front at a pre-selected distance at wider range of speeds
- **Active Steering Assist** functions at a wider range of speeds and can now actively intervene even if road lines are unclear or non-existent at certain speeds; can now function in curves with a tighter radius
- **Active Emergency Stop Assist** brakes the vehicle to a standstill in its lane if it detects that the driver is no longer actively driving the vehicle while it is on the move with Active Distance Assist DISTRONIC and Active Steering Assist engaged. Can now unlock the doors when the vehicle is stationary to allow first aid responders immediate access to the vehicle's interior.
- **Active Lane Change Assist** is a radar-and-camera-based system that aids the driver when changing lanes. When a turn is indicated, this feature will aid with steering into the adjacent lane if it detects the lane is empty
- **Active Speed Limit Assist** can adapt vehicle speed to identified speed limits and can now adjust preemptively when speed limits are going to change
- **Route-Based Speed Adaptation** the vehicle is now able to reduce the speed in anticipatory mode by referencing the COMAND map data ahead of bends, junctions, roundabouts, toll booths and exit roads.
- **Active Brake Assist with Cross-Traffic Function**
- **Evasive Steering Assist** this system assists by adding calculated steering torque to aid in steering wheel movement when a driver deliberately or instinctively performs an evasive maneuver around a pedestrian
- **Active Blind Spot Assist** is active at a wider range of speeds and informs the driver to help avoid an imminent side impact by single-sided braking
- **Active Lane Keeping Assist** is active now at a wider range of speeds

## *Steering Wheel*

### **3-spoke Nappa Leather Multifunction Steering Wheel (L3B)**

The newly redesigned 3-spoke multifunction steering wheel in nappa leather combines a sporty design, compact dimensions and fine materials.

- Steering wheel shift paddles integrated into the back of the steering wheel cross spokes enable manual gear shifting and support a sporty driving style.
- Steering wheel shift paddles in the steering wheel color.
- Optional Active Distance Assist DISTRONIC® or standard cruise control is controlled via steering wheel-mounted controls.
- Touch Control buttons for direct control of the instrument cluster (analogue or digital) and to control the functions of the multimedia system.

## *ENERGIZING Comfort Package*

### **ENERGIZING Comfort Package (488)**

*Option Price: \$550*

*Recommended w/ 399 Multicontour Front Seats w/ Massage Feature and 401 Heated & Ventilated Front Seats for full ENERGIZING Comfort functionality*

- ENERGIZING Comfort is a world-first entering series production to enhance the physical comfort and performance both while driving and during breaks
- It systematically uses the functions of the climate control system (including fragrancing) and the seats (heater, ventilation, massage – when ordered w/ Code 399), the console heating as well as lighting and musical atmospheres, and enables a specific wellness set-up tailored to the mood and need of the driver
- The following six Energizing Comfort programs can be selected: Freshness, Warmth, Vitality, Joy, Comfort, Training (three trainings – muscle relaxation, muscle activation and balance – each with several exercises)
- Each program runs for ten minutes and are visualized on the headunit with color graphics, and backed by suitable music
- Five songs are already stored in the program and if personal music selections are available, for example via the Media Interface, the system analyzes them in the background and assigns them to a program based on the beats per minute (bpm)
- ENERGIZING Comfort also incorporates ambient lighting, which is harmoniously tailored to each of the individual screen designs

## *Enhanced Voice Control*

### **Operate COMAND® and vehicle functions safely and conveniently via Voice Control Standard**

The voice-operated control system allows the multimedia system and now some of the vehicle functions to be operated while driving with as little distraction as possible. Activating Voice Control by pressing the button on the right of the multifunction steering wheel enables the driver to keep their hands on the steering wheel. The system is switched off via the back button on the steering wheel or pressing the same Voice Control button.

#### **Typical commands for the system include:**

- "Navigate to address, POI, contact" - this universal command enables input of all types of destinations and initiates a search through the address book contacts, the navigation database and also on the internet for Points Of Interest
- "Call name (or) number" - this command allows an address book contact as well as a phone number to be called
- "Station name" - this command allows an available station name to be selected when the radio is switched on

#### **But now, in-vehicle functions can be controlled as well. For example:**

- "Turn seat heating on"
- "Change ambient light to blue"
- "Set climate control to 68 degrees"

Vehicle functions can also be controlled with commands such as "Show me the climate control settings menu" or "Start massage". Voice Control can also be used for controlling Mercedes-Benz Apps. For example with commands such as "Find a nearby restaurant" in the POI search.

## 3.0L Inline-6 Biturbo Engine w/ EQ Boost Technology

### 3.0L Inline-6 Turbocharged Engine w/ EQ Boost Technology

Systematically electrified for an outstanding driving experience – the Integrated Starter-Generator boosts and recovers energy, while supplying additional power. The inline six-cylinder engine is both smooth and powerful even on its own – with impressive fuel consumption.

- Systematically lightweight design with reduced friction
- Sophisticated acoustic cladding for quieter operation
- Fully beltless engine
- Incredibly efficient design with impressive acceleration and power
- Twin-scroll turbocharger
- Engine mounts reduce vibration
- Petrol particulate filter reduces minute soot particles significantly below even the most stringent limits
- Electric A/C compressor and water pump
- 48V lithium-ion battery with a capacity of almost 1kWh
  - Able to start the engine and charge the 12V battery
  - Supplies additional torque and horsepower at a range of RPMs and with limited to no lag in power delivery
- Extended coasting or ‘sailing’ while in ECO mode
- Electric Auxiliary Compressor (eAC) minimizes lag and increases response
