**B6 687 0088** £44.00

---

Angel & Driver (IKS protective cover)  
**B6 687 0089** £34.00

---

## Introduction

Welcome to the Mercedes-Benz collection of child seats. We have designed an exclusive choice of seats to ensure that your passengers enjoy the Mercedes-Benz experience as much as you do.

Endurance test: Our child safety seats are examined thoroughly in our own crash tests.

## Sitting safely

When you buy a Mercedes-Benz you naturally expect the highest standards of safety. After all, that is one of the key elements of our brand. When it comes to junior passengers, you can therefore rely on us to make sure they are as safe as possible. That's why our child seats are specifically designed for your Mercedes-Benz.

### **Child safety seats that exceed expectations**

Did you know that the risk of injury and death in an accident is seven times higher for children who are not strapped in? That is why child safety seats are mandatory by law in many countries.

Our child safety seats are tailor-made for your Mercedes-Benz and are perfectly suited to the physique of children in the age groups for which they are intended. For example, our baby seats provide special protection for the neck because a baby's head makes up a quarter of its body weight, compared to only 18% for an adult.

### **Tested by Mercedes-Benz**

Together with the seat belts and safety of your Mercedes-Benz, our child safety seats form an optimal protection system. To guarantee this, they have to pass the most stringent laboratory and crash tests – our own. Whether you're buying DUO, KID or accessories for the integrated child safety seat, you can be sure of the highest possible degree of safety and workmanship. All our seats are also extremely comfortable and are covered with durable, easy-care materials.

### **Innovative and safe: ACSR and ISOFIX**

One result of our continuous development work is the innovative Automatic Child Seat Recognition system – ACSR for short. With the aid of special sensors, your vehicle recognises if a child safety seat with ACSR is fitted on the passenger seat. The passenger front airbag is then automatically deactivated to prevent the risk of injuring the child in the event of a collision.

ISOFIX is an international standard fastening system for child safety seats that offers one-click safety. It operates independently of the vehicle's safety belts by having hooks that snap into metal eyelets on the vehicle seats.

ACSR and ISOFIX are standard features with our DUO seats. ACSR is optional with our KID seat.

## DUO

approx. 8 months to 4 years  
(9 to 18 kg)

DUO is an ideal child safety seat for Mercedes-Benz passengers aged between 8 months and 4 years. With Automatic Child Seat Recognition (ACSR) and ISOFIX as standard, it features the best safety equipment.

### Safe, comfortable and tough

The DUO harness system provides a safe travelling experience. The shoulder belt padding is designed as a force limiter to reduce the pressure on the child's head and neck should you be involved in a severe accident. In addition, DUO lets your child enjoy the comfort you would expect from Mercedes-Benz. For example, an angle adjustment makes napping more comfortable.

The seat comes with colourful 'Angel and Driver' covers made from durable and easy-to-clean breathable fabric.

DUO can be used with both ISOFIX and your Mercedes' 3-point seat belt.

'Angel & Driver' design.

### An overview of the advantages:

- ▶ Equipped with ACSR and ISOFIX
- ▶ Harness system with force limiter
- ▶ Angle adjustment

## KID

approx. 3½ to 12 years  
(15 to 36 kg)

As your child grows so does the KID child safety seat. The height of the backrest can be adjusted to fit your child exactly.

### **KID manages everything**

The KID child seat fits easily into your Mercedes-Benz using the 3-point seat belt. By adjusting the seat height, you can ensure the shoulder strap is in the right position for your child. Belt guides on the side also make sure that the hip belt sits in the right place, i.e. not across your child's stomach.

The comfortable height-adjustable backrest can be used with children up to the age of 12. And to ensure your child is comfortable all the time, KID has a sitting and sleeping position, plus additional side support for head and body.

If you want to use KID in the front passenger seat, it can be fitted with Automatic Child Seat Recognition. This will prevent the front passenger airbag from inflating in an accident, removing the risk of airbag injury.

'Daimler Square' design.

### **An overview of the advantages:**

- ▶ With additional side support for head and body
- ▶ Height-adjustable backrest
- ▶ With sitting and sleeping position
- ▶ Optionally available with ACSR

## Integrated child safety seat (IKS)

approx. 2 to 12 years  
(12.5 to 36 kg)

If your Mercedes-Benz has integrated child safety seats, you can purchase two useful accessories. One is a safety table that provides additional protection to the head and neck for children aged 2 to 4 years. The other is a protective cover that's hard-wearing and easy to wash.

### Fold out, fold away

Two child safety seats can be integrated into the rear seats of your Mercedes-Benz saloon or estate, either as a retrofit or as an optional extra. Because they are permanently installed, you'll know they are always there if you need them – for your own children or for those of friends and family.

Suitable for children weighing from 15 to 36 kg (approximately 4 to 12 years of age). They simply fold away when not needed.

Can be ordered as extras: Integrated child safety seats (IKS).

### Optional extras

A safety table provides extra protection for the head and neck area of young passengers aged between 2 and 4. It is simple to attach using the 3-point seat belt.

You can also purchase a protective cover made from head-wearing, easy-care material. Its padded sides also give your child additional support.

Protective cover and safety table for IKS.

'Angel & Driver' design.

### An overview of the advantages:

- ▶ Safety table to protect head and neck area
- ▶ Protective cover to prevent soiling and for better side support

With regard to the information in this brochure, product changes may have occurred since going to press on 01.01.2005. During the delivery period, construction or form alterations, deviations in the colour shading as well as changes to the scope of deliveries are at the option of the manufacturer insofar as the changes or deviations are reasonable for the purchaser, taking the interests of the seller into consideration. If the seller or manufacturer use symbols or numbers to describe the order or for the ordered object of purchase, no rights can be derived from this alone. The illustrations can also contain accessories or special fittings that do not belong to the standard scope of supplies. Colour deviations are print-related.
