[quote=arvindm;3811428]I got the kit on ebay from MTEC. Go to ebay and type in MTEC hid kit and you should see the kits available. You can negotiate your price down by makin an offer. I dont know how to post pictures, so I cant post them here.

Thanks[/quote]

Arvindm, In your original post, you mention that you need to get your headlights adjusted. Why do you need to have them adjusted if everything fit in the original light sockets? I am really looking at making this investment. My stock lights suck.

I would really like to see some pictures if you can. You add the pictures below this posting screen. Click on the button for manage attachments
