Connecting pieces

The measuring set is designed in such a way, that the measuring bolts, according to the measuring points at the vehicle, can be screwed together out of mounting bolts, extensions and measuring tips/bolts.

The configuration of the measuring bolts is shown in the table, where the digits in the column headed "Measuring bolt configuration" are the special tool end numbers.

Example: 02/07/10 = 168 589 07 63 **02** (support stud)

168 589 07 63 **07** (extension) 168 589 07 63 **10** (measuring tip)

| Distance and comparison measurement | Measuring bolt configuration | Telescopic measuring rod |
|-------------------------------------|------------------------------|--------------------------|
| H2 | 02/07/05/socket wrench bit | 124 589 02 19 00 |
| H5 | 02/07/05/socket wrench bit | 124 589 02 19 00 |
| H6 | 02/07/05/socket wrench bit | 124 589 02 19 00 |
| H7 | 02/07/05/socket wrench bit | 124 589 02 19 00 |
| Н9 | 02/07/05/socket wrench bit | 124 589 02 19 00 |

1 Measure comparison dimension (H2) from the check bore (K) $\,$

to the centering point of the Torx bolt head of the front bearing of the rear axle carrier. Measure on the left and right side in each case.

If necessary, unscrew and screw in Torx bolts and check for deformation.

P40.30-2150-11

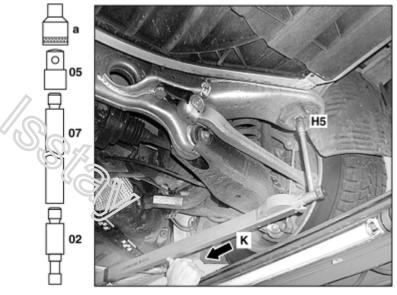

2 Measure comparison dimension (H5) from the check bore (K) $\,$

to the centering point of the Torx bolt head of the rear bearing

of the rear axle carrier. Measure on the left and right side in each case.

i If necessary, unscrew and screw in Torx bolts and check for deformation.

Shows model 211

P40.30-2151-11

3 Measure distance dimension (H6) from the centering point of the Torx bolt heads between the front bearings of the rear axle carrier.

Shows model 211

P40.30-2152-11

4 Measure distance dimension (H7) from the centering point of the Torx bolt heads between the rear bearings of the rear axle carrier.

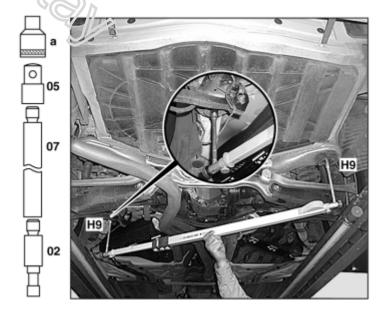

Shows model 211

5 Measure distance dimension (H9) diagonally from the centering point of the Torx bolt heads between the front and rear bearing of the rear axle carrier. Measure on the left and right side in each case.

Shows model 211
