

BE40.20-P-1000-03I	Vehicle level - rear axle	Model 211	 BE
--------------------	---------------------------	-----------	--

#### Check values for rear axle vehicle level control

Number	Designation			Model 211.0, with 4matic and steel suspension (standard)
BE40.20-P-1001-03I	Vehicle level - rear axle		±°	+1.8 (±1.0)
BE40.20-P-1002-03I	Permissible difference in vehicle level between right and left sides of the vehicle	When checking	±°	1
		When calibrating with Star Diagnosis	±°	0.5

#### Check values for rear axle vehicle level control

Number	Designation			Models 211.0/2 USA, with 4matic, with Airmatic (code 489), with suspension with increased ground clearance (code 482)
BE40.20-P-1001-03I	Vehicle level - rear axle		±°	+0,8
BE40.20-P-1002-03I	Permissible difference in vehicle level between right and left sides of the vehicle	When checking	±°	
		When calibrating with Star Diagnosis	±°	0.5

#### Check values for rear axle vehicle level control

Number	Designation			Model 211.2 USA with 4matic, with rear air suspension and front steel suspension	Models 211.0/2 with Airmatic (code 489), except 4matic
BE40.20-P-1001-03I	Vehicle level - rear axle		±°	+0.2 (±1.0)	-1.1 (±1.0)
BE40.20-P-1002-03I	Permissible difference in vehicle level between right and left sides of the vehicle	When checking	±°	1	1
		When calibrating with	±°	0.5	0.5

		Star Diagnosis		
--	--	----------------	--	--

#### Check values for rear axle vehicle level control

Number	Designation			Model 211.0 except 4matic, with steel suspension (standard)	Model 211.0 except 4matic, with MB sports suspension (code 486) or AMG
BE40.20-P-1001-03I	Vehicle level - rear axle		∓°	-0.8 (±1.0)	-2.7 (±1.0)
BE40.20-P-1002-03I	Permissible difference in vehicle level between right and left sides of the vehicle	When checking	∓°	1	1
		When calibrating with Star Diagnosis	∓°	0.5	0.5

#### Check values for rear axle vehicle level control

Number	Designation			Model 211.0 with steel suspension and suspension with increased ground clearance (code 482), except 4matic, except MB sports suspension (code 486) except AMG
BE40.20-P-1001-03I	Vehicle level - rear axle		∓°	+3.6 (±1.0)
BE40.20-P-1002-03I	Permissible difference in vehicle level between right and left sides of the vehicle	When checking	∓°	1
		When calibrating with Star Diagnosis	∓°	0.5

#### Check values for rear axle vehicle level control

Number	Designation			Model 211.2 with steel suspension (standard), except 4matic	Model 211.2 with MB sports suspension (code 486) or AMG, except 4matic
BE40.20-P-1001-03I	Vehicle level - rear axle		∓°	-0.8 (±1.0)	-2.1 (±1.0)

BE40.20-P-1002-03I	Permissible difference in vehicle level between right and left sides of the vehicle	When checking	4°	1	1
		When calibrating with Star Diagnosis	4°	0.5	0.5
