P68.30-3271-06

## Modification notes

30.3.06	Removing and installing lower paneling on D-pillar replaced with removal and installation of load compartment inner paneling	Steps 3 and 14	
---------	--	----------------	--

	Removing		
	Note on function reliability of windowbag		AH91.60-P-0693-01A
1	Unhook load compartment cover on both load compartment cover guide rails (4).		
2	Remove paneling on left and right C-pillar	Do not remove belt end fitting.	AR68.30-P-4490TA
3	Remove left and side load compartment inner paneling		AR68.30-P-1180T
4	Unscrew bolt (5).		
5	Carefully unclip upper paneling (1) from clip (2) with mounting wedge		*110589035900
6	Push upper paneling (1) toward front out of load compartment cover guide rail (4) and pivot to side until electrical connector on left load compartment lamp (E15/8) and right load compartment lamp (E15/9) is accessible.	Clips (3) remain on roof frame	
7	Disconnect electrical connector from left load compartment lamp (E15/8) and right load compartment lamp (E15/9) and remove upper paneling (1).		
	Install		
8	Remove clips (3) from roof frame and install in upper paneling (1).	Replace damaged clips (3). 	*WH58.30-Z-1004-19A
9	Connect electrical connector for left load compartment lamp (E15/8) and right load compartment lamp (E15/9) to corresponding wiring harness.		
10	Insert upper paneling (1) into load compartment cover guide rail (4).		
11	Clip upper paneling (1) to D-pillar	Ensure that rear check strap of windowbag is routed correctly. Otherwise the window no longer functions properly	
12	Tighten bolt (5)		
13	Fit frame on upper and lower corners		

14	Install left and right side load compartment inner paneling.		AR68.30-P-1180T
15	Install paneling on left and right C-pillar.		AR68.30-P-4490TA
16	Hook load compartment cover into both load compartment guide rails (4).
