

AP41.10-P-4152-01ZA	Check spacers of flexible couplings in vicinity of fitted sleeves	Model 211	
---------------------	--	-----------	--

1 Check spacers in vicinity of fitted sleeves (arrows) for cracks (visual inspection).

2 If there is evidence of deformation, relieve stress from propeller shaft. If the deformation is permanent, the flexible coupling must be replaced as a separate repair order.

 If there are cracks or permanent deformations, replace flexible coupling as a separate repair order.
