

MODEL 204.0 /2 with CODE (414) Power glass tilting/sliding roof

MODEL 212

with CODE (414) Power glass tilting/sliding roof
up to model year 2011

Shown on model 204.0

- 1 Water drain rail
- 2 Tilting bracket
- 3 Slider

P77.20-2653-06

☒ ☒	Remove/install		
1	Remove tilting/sliding roof panel		AR77.20-P-2852CW
2	Unclip water drain rail (1) from left and right tilting bracket (2) (arrow)		
3	Unclip water drain rail (1) from left and right slider (3) and remove.	<p>i When water drain rail (1) is removed, do not move tilting/sliding roof toward rear. This can cause the sliders (3) to be pushed toward the rear making it necessary to reposition them toward the front with great effort.</p>	
4	Install in the reverse order
