

Model 204, 207, 212, 218, 231

Modification notes

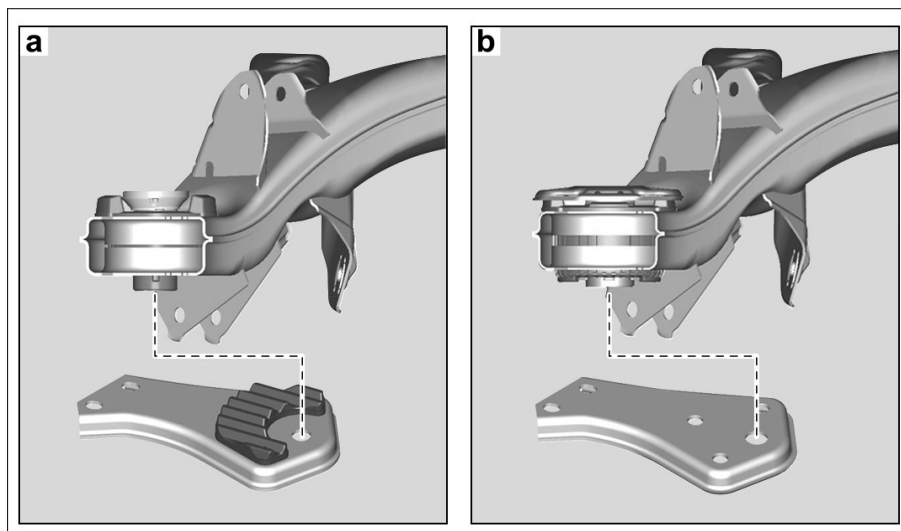

03.08.2022	Ordering information, updated.		
------------	--------------------------------	--	--

We would like to inform you that, on the vehicle model series mentioned above, the rear axle carrier and the front elastomer bearings have been optimized for individual vehicle model designations. As a result, the new stop plates (picture b) must be installed on vehicle model designations with optimized rear axle carriers and elastomer bearings.

i For this, the additional information in the XENTRY Portal Parts Information must be strictly observed during the ordering process. If no additional or changed parts are displayed, the old stop plates can be reused.

i The stop plates and rear axle carriers are shipped ready for assembly. No further conversion measures are required between old and new parts.

Shown on model 204

P35.10-A019-05

Parts ordering note

Part no.	Designation	Quantity
A 205 352 07 00	Left stop plate (except model 207.4)	1
