Mercedes-Benz MY17 E-Class Wagon (S213)

MY17 E-Class Wagon

An important note about this Guide:

The information presented in this guide is based on the most current information available and is intended for internal use only. Mercedes-Benz reserves the right to make changes at any time, without notice, to colors, materials, equipment, special specifications and models. Pricing may not yet be finalized for some models or options.

Due to variances among monitors and printers the colors that appear on your screen and printouts may not be exact.

For illustrative purposes, some images may show vehicles with European Specification.

What's new: PRE-SAFE® Sound

Standard on all E-Class models

Part of PRE-SAFE, PRE-SAFE Sound is an acoustic occupant preconditioning system which can reduce the effects of the noise from an accident on the occupants hearing.

- When the PRE-SAFE system recognizes a certain dangerous situation, the onboard sound system plays a brief rushing sound, also known as 'Pink Noise', to precondition the hearing
- The natural reflex mechanism of the stapedius muscle enables the inner ear to rapidly prepare for the accident-induced high pressure sound
- Up to 40% reduction of noise exposure impact

What's new: 531 - COMAND® Navigation (NTG 5.5)

Standard on all E-Class models

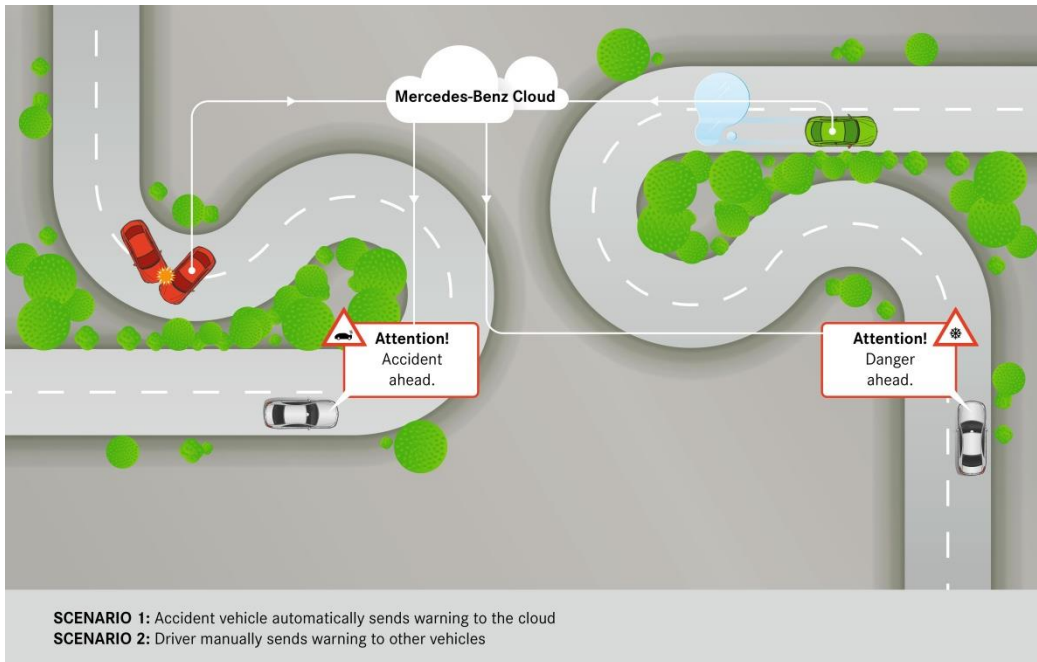

The COMAND® system at a glance:

- High-resolution 12.3-inch display
- Fast HDD navigation with 3D maps
- Map Updates & Live Traffic Included for 3 years
- WiFi hotspot provides 4G-LTE internet connection
- Smartphone Integration with Apple CarPlay™ & Android Auto
- *Bluetooth* hands-free and audio streaming
- Voice-operated control system
- Car-to-X Communication

What's new: Car-to-X Communication

Standard on all E-Class models

- Exchange of information with other vehicles in the surrounding area (now only from new E-Class to new E-Class) for:
 - Break-downs
 - Accidents
 - Hazardous weather (ice, fog, rain, snow, etc.)
- Driver can also send a warning manually
- Warning according to situation:
 - Icon on navigation display
 - Instrument cluster
 - Voice output

What's new: Touch Control Buttons

Standard on all E-Class models

The new E-Class introduces the all new concept of Touch Control Buttons on the 3-spoke steering wheel to operate the instrument cluster and the headunit by horizontal and vertical swiping movements of the finger. The main focus is to keep the customer's hands on the steering wheel and eyes on the road.

- The instrument cluster display is operated by the left Touch Control Button
- The headunit (incl. navigation) is operated by the right Touch Control Button

What's new: 448 – Touchpad

Standard on all E-Class

The functions of COMAND® navigation can be controlled intuitively via the innovative touchpad, using single or multi-finger gestures (multi-touch).

- Touchpad approx. 2.56 x 1.77 inches in size
- Additional full-fledged input option supplementing the COMAND® Controller, Touch Control Buttons on the steering wheel and voice control
- Recognizes single and multi-finger gestures (multi-touch), swiping movements and zoom gestures achieved by spreading the fingers or pinching them together
- Innovative handwriting recognition feature: Users are able to input letters, special characters and numbers in their normal handwriting, in any language available in the headunit
- 3 buttons located on the touchpad allow fast and direct operation of important functions
- Clear haptic feedback when using the touchpad or keys

What's new: 897 - NFC Wireless Charging

Optional on all E-Class, included in Premium Package P01

- Pairing to the headunit via NFC
- Wireless charging of smartphones that support the Qi standard
 - For charging, place the smartphone in the front storage compartment in the center console
 - Storage compartment designed for mobile phones with a screen diagonal of up to 6 inches

What's new: 463 – Head-Up Display *Limited availability*

Optional on all E-Class, included in Premium Package P03

The Head-Up Display at a glance:

- Key driver information at a glance (e.g. navigation tips, incoming calls, speed, settings for cruise control, assistance system messages) without the driver having to take their eyes off the road
- Projection of a virtual image measuring approx. 8.3 x 2.8 inches into the driver's field of vision, which appears to float around 78.7 inches in front
- Presentation of information in high-resolution and in color, making it clearly legible even on sunny days and at night
- Height position of the image, brightness and displayed content can be changed individually via a menu in the instrument cluster

What's new: B59 - DYNAMIC SELECT

Standard on all E-Class

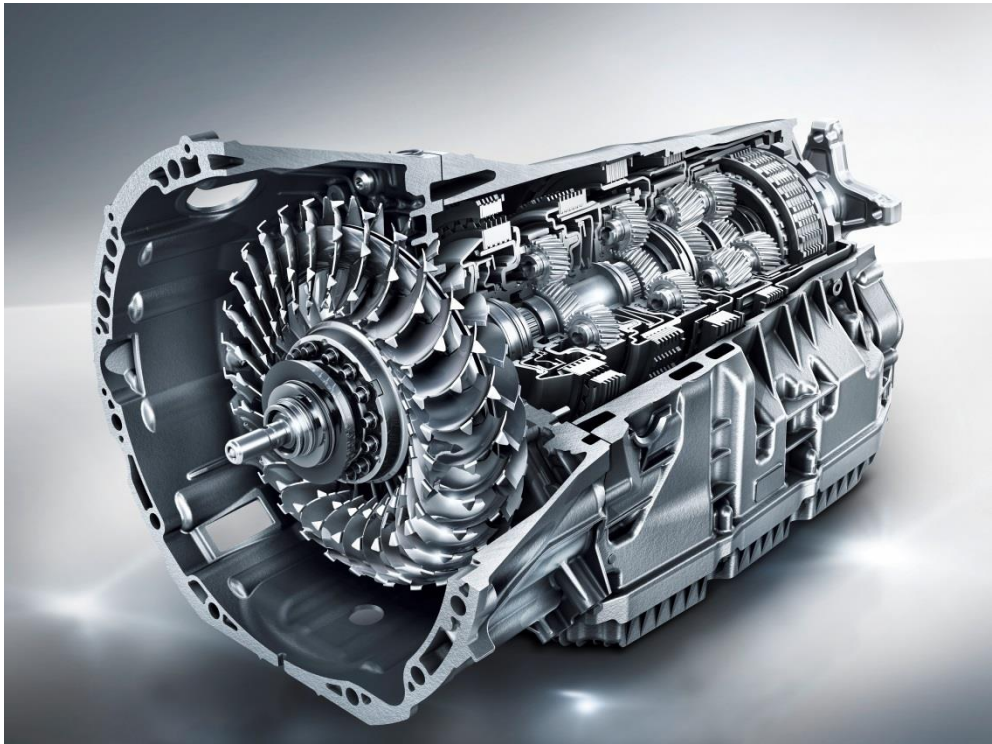

At a touch of the DYNAMIC SELECT selector, drivers can choose between comfortable, sporty, particularly sporty, and efficient driving styles, or even their own individually defined style. Parameters such as the engine, transmission and steering characteristics are adjusted according to the selected drive mode.

Choice of up to 5 different driving programs:

1. Comfort “C” standard setting: well-balanced and fuel-efficient
2. Eco “E” mode: for keeping fuel consumption as low as possible
3. Sport “S” mode: added agility and dynamism due to direct steering characteristics sporty, taut suspension tuning, spontaneous throttle response and modified shift points
4. Sport+ “S+” mode: even sportier performance, the suspension (in conjunction with AIR BODY CONTROL air suspension) and drive system have an even more dynamic setup
5. Individual mode: individual parameters can be varied as required, using the Controller and the configuration menu in the headunit

What's new: 421 – 9G-TRONIC Automatic Transmission

Standard on all E-Class

9G-TRONIC – faster, smoother, more efficient

Featuring nine forward gears, this automatic transmission takes efficiency, comfort and dynamism to a completely new level. It is the new generation 9-speed automatic transmission with hydrodynamic torque converter in the premium segment. The larger ratio range allows a reduction in engine speed. Performance remains excellent while ride comfort is enhanced and noise levels are reduced. The reduced intervals between the gears lead to faster gear changes and enhanced spontaneity and agility. At the same time, the 9G-TRONIC transmission impresses with smooth, barely perceptible gear shifting like that of a continuously variable transmission. As the 9G-TRONIC transmission is able to skip individual gears, multiple downshifts are possible for fast and powerful sprints.

Visual Equipment Differentiation

Headlights

LED Headlamps* (Standard)

- All functions feature LED technology
- Excellent illumination of the road
- Integrated LED daytime running lamps with fiber optic effect
- Projector LED low-beam and reflective LED high-beam technology
- New LED taillamps featuring 72 LEDs
- Low energy consumption
- Color of emitted light more similar to that of daylight
- Much longer bulb life

LED Intelligent Light System* (Included in P02 Premium Package)

All functions of the standard LED headlamps plus:

- Automatic high-beam control by Adaptive Highbeam Assist
- Automatic adaptation of headlamps to weather, lighting and driving conditions for ideal visibility in every situation
- Automatically activated cornering lights
- Active light function for significantly better illumination in bends
- Distinctive look during day and night

Visual Equipment Differentiation

Steering Wheels

L3C - Standard – 3-spoke Multifunction Steering Wheel

- Standard on all models
- The all new 3-spoke steering wheel in nappa leather comes with unique Touch Control Buttons in the control panels on the left and right. The steering wheel is embossed in the center grip area.

L3D – Wood/leather Steering Wheel (requires 731)

\$590

- Optional on all models
- The combination of high-quality leather in the grip area and fine wood inserts at the top and bottom make this steering wheel a visual and tactical highlight.
- Only available with Burl Walnut Wood (731). N/A with heated steering wheel (443).

443 – Heated Steering Wheel

\$250

- Optional on all models
- On cold days, heating of the steering wheel rim very rapidly ensures cozy temperatures of the grip area and thus also warm hands. The switch for turning the heating on and off is positioned right next to the steering wheel.
- N/A with Wood/leather steering wheel (L3D).

Product Highlights: Active Brake Assist *(Formerly CPA PLUS)*

Standard on all models

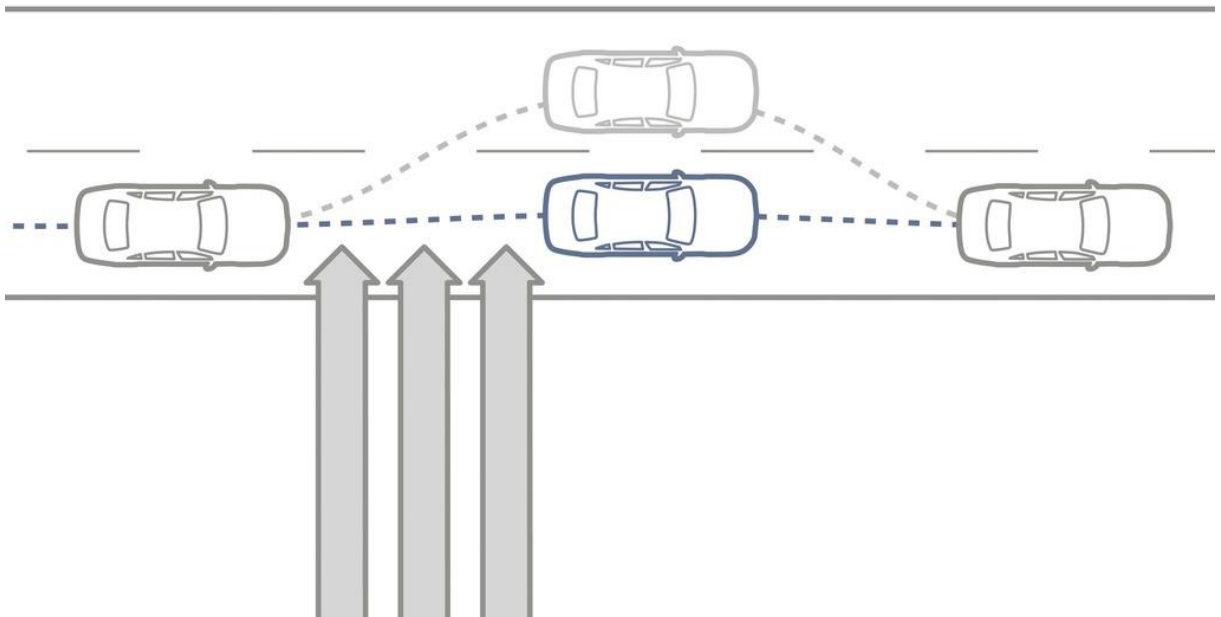

- Radar-based driving assistance system that can help prevent accidents with vehicles ahead and with crossing pedestrians or mitigate the consequences of accidents
- Combination of proximity warning, collision warning, on-demand braking assistance and autonomous braking function
- Additional audible warning if the distance diminishes rapidly
- If the driver initiates emergency braking – if necessary – increase in braking pressure by the on-demand braking assistance
- Initiation of autonomous braking if the driver fails to react
- Visual and audible warning plus almost simultaneous emergency braking if an impending collision with a **crossing pedestrian** is detected

Product Highlights: Crosswind Assist

Standard on all models

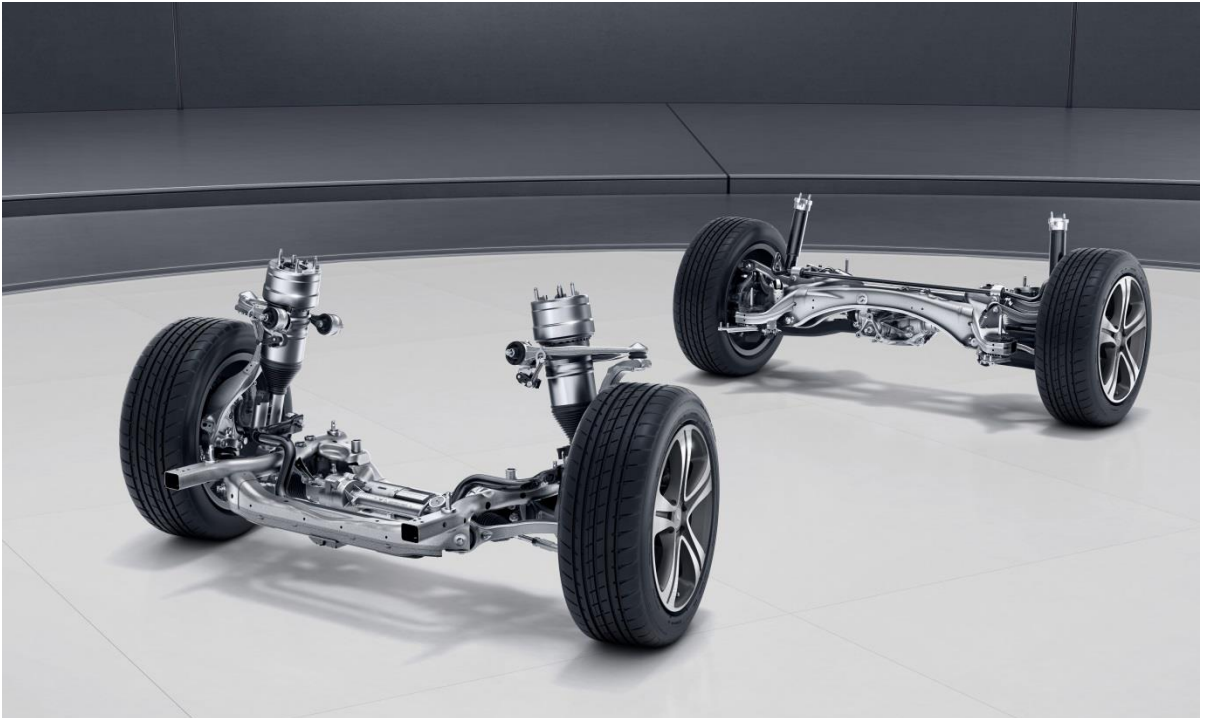

- Traditionally, strong gusts of wind may lead to sudden lateral drift of the vehicle
- Crosswind Assist aids the driver by reducing the vehicle's lateral drift substantially in windy driving conditions
- Crosswind Assist is integrated into the ESP® sensor system and enables the timely detection of gusts of crosswind
- Automatic brake intervention on the wheels on the side of the vehicle facing the wind results in a motion which counteracts the crosswind
- Crosswind Assist substantially enhances the driver's sense of control, stability and safety

Product Highlights: AIR BODY CONTROL

Optional on all models

- Multi-chamber air suspension combined with continuously adjustable damping to improve ride comfort and driving dynamics
- Vehicle characteristics can be varied from comfortable through to sporty using DYNAMIC SELECT switch
- "Comfort" and "Sport" settings for a more comfortable or stiffer, sportier setup
- Constant vehicle level irrespective of load thanks to pneumatic all-round self-levelling suspension
- Suspension level can be raised for poor surfaces and is automatically lowered at high speeds, helping to reduce aerodynamic drag and further improve handling stability

Product Highlights: Burmester® Surround Sound System

Optional on all models – Included in P01 Premium Package

- 13 high-performance speakers precisely configured for the vehicle interior to ensure well-balanced and very dynamic music reproduction
- 9-channel DSP amplifier with a total output of 590 watts (7 x 50 W and 2 x 120 W) for maximum sound quality with very high volume reserves
- Frontbass® technology with woofers integrated into the dash for vibrant bass reproduction
- Combination of digital and analogue filter elements for the unique Burmester® "feel-good sound"
- Sound optimization for the front and rear seats
- Noise compensation (VNC)
- Sound preset: surround function to generate virtual all-round sound
- Support for popular multi-channel formats such as Dolby Digital 5.1/DTS for example, for true surround sound

Product Highlights: Intelligent Drive - Overview

Optional on all models – Included in P03 Premium Package

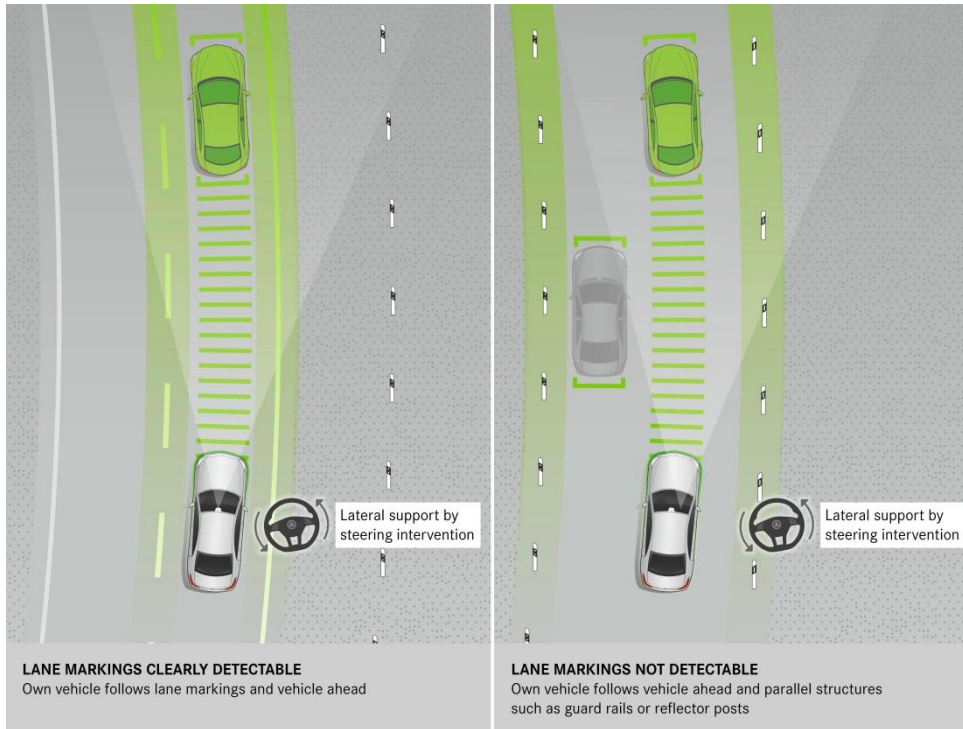

“Intelligent Drive” is a gateway to a more autonomous & accident-free driving which increases safety for all drivers on the road. The following lists all features that are available with the all new E-Class:

- **DRIVE PILOT** (includes Distance Pilot DISTRONIC, Steering Pilot, Active Lane Change Assist, Active Emergency Stop Assist, and Speed Limit Pilot)
- **Active Brake Assist with Cross-Traffic Function**
- **Evasive Steering Assist**
- PRE-SAFE® PLUS
- **PRE-SAFE® Impulse Side**
- Active Lane Keeping Assist
- Active Blind Spot Assist

Product Highlights:

Intelligent Drive – DRIVE PILOT

Optional on all models – Included in P03 Premium Package

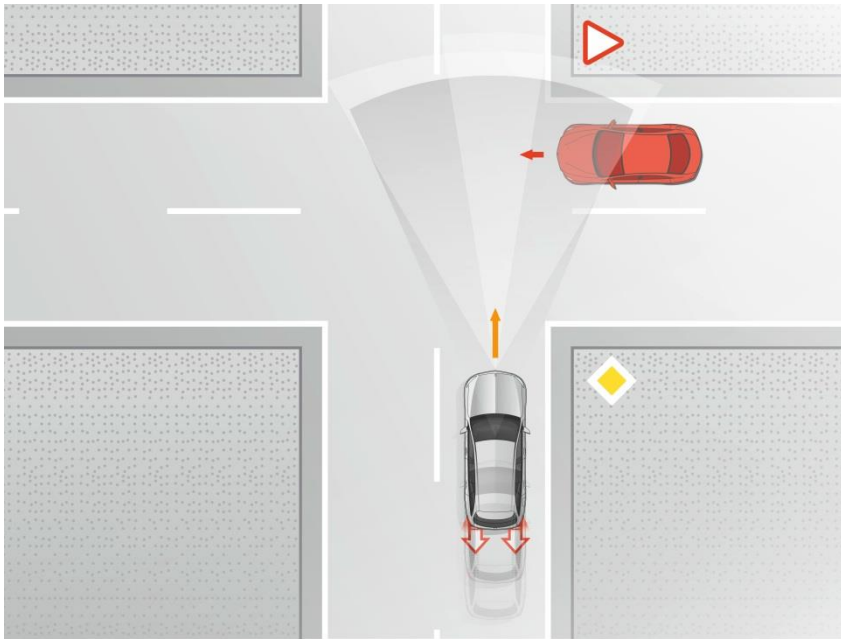

- Steering Pilot generates steering torque which helps the driver to keep the vehicle in the center of its lane (straight roads and slight bends), taking its guidance from vehicles ahead and road lane markings
- Active Lane Change Assist helps the driver with changing lanes by means of steering torque when the driver initiates the change by activating the turn indicator and the system does not detect another vehicle in the adjacent lane
- Extended tolerance for the hands-off warning of Steering Pilot with intelligent hands-on detection
- Active Emergency Stop Assist brakes the vehicle to a controlled stop if the system detects that the driver is permanently distracted or is no longer able to operate the vehicle
- Distance Pilot DISTRONIC maintains the selected distance from the vehicle in front, and works in the speed range from 0 – 130 mph, also reacting to stationary vehicles at low speeds

Product Highlights:

Intelligent Drive – Active Brake Assist with Cross-Traffic Function

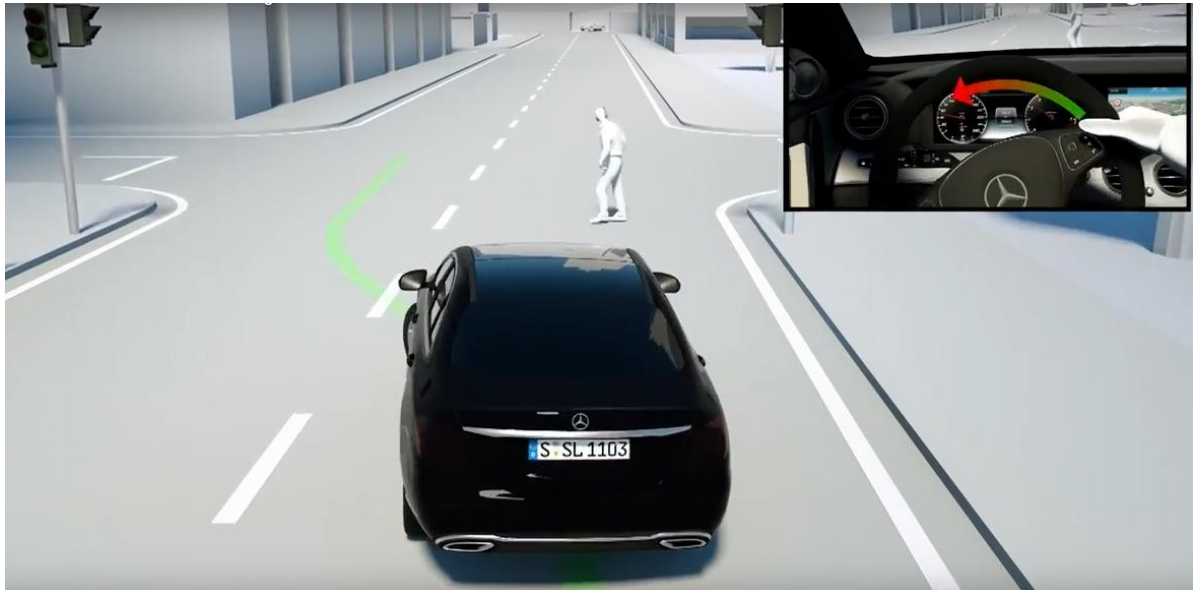

Optional on all models – Included in P03 Premium Package

- The system is able to reduce the risk of collisions and accidents at road junctions
- Monitoring of traffic situation ahead of the vehicle by means of radar sensors and stereo multipurpose cameras
- Vehicles travelling ahead are detected up to a speed of 130 mph
- Crossing traffic and bicyclists are registered up to a speed of 45 mph, as well as pedestrians who are stationary or moving slowly in the path of the vehicle
- When danger of a collision is detected, the system gives a visual and audible warning and brakes
- If the driver firmly applies the brakes, the system calculates the brake pressure that would be needed to prevent a collision
- If a collision cannot be prevented, the impact speed is reduced as much as possible by emergency braking

Product Highlights: Intelligent Drive – Evasive Steering Assist

Optional on all models – Included in P03 Premium Package

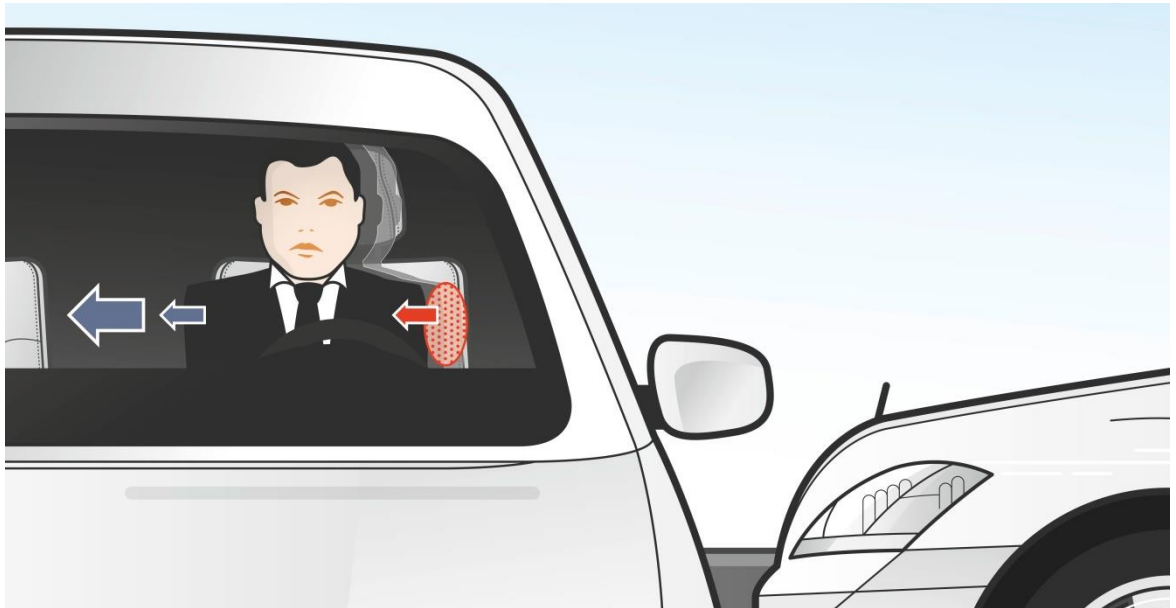

- When the driver deliberately or instinctively performs an evasive maneuver in a dangerous situation (pedestrian crossing the street), Evasive Steering Assist provides assistance by adding precisely calculated steering torque to support the movement of the steering wheel
- This helps the driver to avoid a pedestrian in a controlled manner while subsequently facilitating the movement of the vehicle to allow the situation be negotiated safely

Product Highlights:

Intelligent Drive – PRE-SAFE® Impulse Side

Optional on all models – Included in P03 Premium Package

- PRE-SAFE® Impulse Side initiates preventative protective measures against an impending side impact, supplementing the measures taken by PRE-SAFE® and PRE-SAFE® PLUS
- In the event of a side impact, PRE-SAFE® Impulse Side can have a positive effect by increasing the distance between the occupant and the door, and at the same time reducing the relative speeds between the side structure and the occupant's torso
- In the event of a recognized, unavoidable side collision, the system can give the driver or front passenger a slight push towards the center of the vehicle on the side facing the impact
- This lateral impulse is initiated by very rapid inflation of an air chamber in the seat bolster
