AMG enhanced 3.0L Inline-6 Turbo Engine w/ EQ Boost Technology

AMG enhanced 3.0L Inline-6 Turbo Engine w/ EQ Boost Technology

Systematically electrified for an outstanding driving experience – the Integrated Starter-Generator boosts and recovers energy, while supplying additional power. The inline six-cylinder engine is both smooth and powerful even on its own – with impressive fuel consumption.

- Systematically lightweight design with reduced friction
- Sophisticated acoustic cladding for quieter operation
- Fully beltless engine
- Incredibly efficient design with impressive acceleration and power
- Twin-scroll turbocharger
- Engine mounts reduce vibration
- Petrol particulate filter reduces minute soot particles significantly below even the most stringent limits
- Electric A/C compressor and water pump
- 48V lithium-ion battery with a capacity of almost 1kWh
 - Able to start the engine and charge the 12V battery
 - Supplies additional torque and horsepower at a range of RPMs and with limited to no lag in power delivery
- Extended coasting or ‘sailing’ while in ECO mode
- Electric Auxiliary Compressor (eAC) minimizes lag and increases response

Handcrafted AMG 4.0L V8 biturbo engine (M177 E40DEH LA AMG)

Handcrafted AMG 4.0L V8 Biturbo engine (M177 E40DEH LA AMG)
E 63 S

- **Aluminum crankcase** featuring a racing inspired closed-deck design
 - The area around the cylinders' coolant enclosure is closed off at the top and is only perforated by cooling channels
 - This makes the engine block more rigid and able to withstand greater loads
- **Forged, lightweight aluminum pistons** – high performance and low weight
- **Two Twin-scroll turbochargers** with separate exhaust channels
 - Positioned between the cylinder heads for faster response
 - Inspired by Formula 1
 - Keeps engine compact, improves turbo response and lowers emissions
 - Separate exhaust channels prevent turbos from having a negative impact on each other during load/directional changes, and enables faster spooling/buildup of turbo pressure
- **Dynamic Engine Mounts** – Adjust to DYNAMIC SELECT mode and driving conditions
 - “Soft Mounts” for Comfort – Reduces engine noise and vibration
 - “Hard Mounts” for Sport – Increases steering precision
- **Variably Adjustable Inlet and Outlet Valves**
 - Filled with sodium
 - Light weight

- Rear axle: brake discs measuring 14.2 x 1.0 inch, internally ventilated and perforated with 1-piston floating caliper
- Increased fade resistance and reduced thermal deformation of brake discs
- Red-painted brake calipers with “AMG” lettering

AMG High-Performance Ceramic Composite Braking System (B07)

Option price: \$8,950 (E 63 S only)

6-piston front and 1-piston rear calipers

- Front axle: composite ceramic disc with a diameter of 15.8 x 1.5 inch, internally ventilated and perforated, with 6-piston fixed caliper
- Rear axle: integral brake disc with a diameter of 14.2 x 1.3 inch, internally ventilated, perforated and grooved with 1-piston floating brake caliper
- 40% weight savings compared to conventional brake discs
- Bronze-painted brake calipers with “AMG Carbon Ceramic” lettering

Advisory on B07 AMG High-Performance Ceramic Compound Braking System

The AMG Ceramic Composite Braking system has numerous benefits – namely, it is 40% lighter than a conventional steel braking system, offers significantly longer service life for the brake rotors, and provides exceptional resistance to brake fade under repeated aggressive stops.*

The materials in your AMG Ceramic Compound Braking system were derived from Formula One technology, and therefore will perform differently than conventional brakes.

Especially when cold, this ceramic composite material will resonate during braking and potentially feel less responsive under light brake pressure but with no loss in braking power. You will hear sounds, e.g. squealing, that you might not expect and which may be louder than what you are used to during ordinary everyday braking maneuvers – rest assured that this is a normal operating characteristic for this brake system, and is a by-product of the unique properties of the material. Mercedes-AMG recommends that the driver engage the brakes in an assertive manner in order to mitigate some of this noise during normal operation; Mercedes-AMG also recommends that the brakes be brought up to operating temperature before use in high-performance driving situations in order to improve braking performance.

**Brake weight based on AMG Germany official measurements, Service life based on F1 Safety car longevity and is dependent on individual driving style and conditions and will vary. Brake pads and rotors should be regularly serviced to ensure proper wear. Please reference your Mercedes-AMG Maintenance Booklet or contact your dealer for scheduled intervals.*

AMG Performance Exhaust System (U78)

AMG Performance Exhaust System (U78)

Option price: \$1,250

- Stronger differentiation of the sound characteristics by means of two additional exhaust flaps
- Sound characteristics dependent on selected drive program – clear differentiation between rich in drive programs “C” and “S” and emphatically sporty in drive programs “S+” and “Race” (*“Race” mode on E 63 S Only*)
- Additional control of the sound characteristics by means of a button in the middle control panel of the center console
- Control by means of variably adjustable exhaust flaps – without loss of power
- Control of the exhaust gas flaps is dependent on both engine speed and load, ensuring 100% power delivery
- Double declutching (in “S”) and a misfire (in “S+” and “Race” emphasize the sporty characteristics of the particular drive programs (*“Race” mode on E 63 S Only*))

AMG Track Pace App for Apple iPhone® (256)

AMG Track Pace App for Apple iPhone® (256)

Option price for E 53: \$250

Standard for E 63 S

With the "AMG Track Pace" app, a smartphone can be turned into a personal racing engineer. This enables lap/sector times or even videos to be recorded and analyzed. Another attractive feature is the option to exchange data with other AMG drivers e.g. via social networks.

Overview of the AMG Track Pace app:

- Stores vehicle-specific data (e.g. speed, acceleration) as well as lap and sector times
- Video recordings via smartphone/GoPro are also possible
- Driving ability can be analyzed and improved in a targeted manner
- Connection via WLAN
- Exchange data with other AMG drivers via social networks such as Facebook (Share function) or the AMG Private Lounge
