## AMG-enhanced 3.0L Inline-6 Turbo Engine w/ EQ Boost and Electric Auxiliary Compressor

### AMG-enhanced 3.0L Inline-6 Turbo Engine w/ EQ Boost and Electric Auxiliary Compressor (M256)

The M256 engine found in AMG “53” models provides exceptional power output thanks to exciting new technologies:

- EQ Boost:
  - The M256 utilizes a 48V system to provide power to the electric water pump, AC compressor, Electric Auxiliary Compressor. With these components now being electrified, the engine is now fully beltless, reducing wearable parts.
  - EQ Boost makes use of the stored electric power from the 48V battery with an “Integrated Starter-Generator” which combines the starter and alternator in a powerful electric motor which is positioned between the engine and transmission. This EQ Boost unit assists the internal combustion engine with up to 21 hp and 184 lb-ft of torque at low engine speeds.
    - *Please note that this boost in hp / torque never impacts the certified peak power figures, as the boost is generated at such low engine speeds, and only for brief periods of time.*
  - On overrun, EQ Boost is able to recover up to 80 percent of the energy to the 48V battery.
  - The engine is able to start very quietly by utilizing stored power in the 48V battery. ECO Start/Stop is also almost imperceptible now that it uses the EQ Boost system.
    - *Please note that the 48V battery is small- it is a little less than 1 kWh in capacity.*
  - The conventional 12V battery is still used by the vehicle and is charged by the 48V battery. Most electrical vehicle components remain wired for 12V and thus, the 12V battery is used to provide power for cabin lights, exterior lighting, the multimedia system, etc.
- Electric Auxiliary Compressor:
  - This new engine component (exclusive to the “53” models) is able to assist in spooling the engine’s exhaust-gas-driven turbocharger quickly and effectively at low-to-mid RPMs. Able to get up to speeds of 70,000 RPMs within less than a third of a second, the eAC is extremely quick to provide added boost. This allows a much larger turbocharger to be employed in this version of the M256. In some cases, boost from the Electric Auxiliary Compressor is able to be routed directly to the engine itself.
  - In one minute, the Electric Auxiliary Compressor is able to function three times for two seconds, or one time for 15 seconds.

## *Handcrafted AMG 4.0L V8 biturbo engine (M177 E40DEH LA AMG)*

Handcrafted AMG 4.0L V8 Biturbo engine (M177 E40DEH LA AMG)  
E 63 S

- **Aluminum crankcase** featuring a racing inspired closed-deck design
  - The area around the cylinders' coolant enclosure is closed off at the top and is only perforated by cooling channels
  - This makes the engine block more rigid and able to withstand greater loads
- **Forged, lightweight aluminum pistons** – high performance and low weight
- **Two Twin-scroll turbochargers** with separate exhaust channels
  - Positioned between the cylinder heads for faster response
  - Inspired by Formula 1
  - Keeps engine compact, improves turbo response and lowers emissions
  - Separate exhaust channels prevent turbos from having a negative impact on each other during load/directional changes, and enables faster spooling/buildup of turbo pressure
- **Dynamic Engine Mounts** – Adjust to DYNAMIC SELECT mode and driving conditions
  - “Soft Mounts” for Comfort – Reduces engine noise and vibration
  - “Hard Mounts” for Sport – Increases steering precision
- **Variably Adjustable Inlet and Outlet Valves**
  - Filled with sodium
  - Light weight

## *U88 AMG Drive Unit Steering Wheel Buttons: \$400*

### **AMG Drive Unit Steering Wheel Buttons**

- When U88 is selected, the AMG Performance Steering Wheel is equipped with a round controller with an integral display beneath the right-hand steering wheel spoke, plus two vertically positioned color display buttons beneath the left-hand steering-wheel spoke
- The round display allows for easy adjustment of the AMG DYNAMIC SELECT Drive Mode
- The vertically-mounted displays offer a configurable hot-key to adjust two key parameters, i.e. a switch to Manual transmission mode (or to Automatic shifting) or a switch from the Comfort exhaust setting to the more emotional Sport setting
- These buttons allow the driver to concentrate fully on dynamic driving without having to take their hands off the wheel in order to change performance-oriented vehicle settings

*Please note that AMG Drive Unit Steering Wheel Buttons are not able to be equipped in conjunction with Warmth and Comfort Package (DB0) or Heated Steering Wheel (443).*

*AMG Drive Unit Steering Wheel Buttons are required in conjunction with AMG Performance Steering Wheel in DINAMICA (L6G).*

## *Brakes*

### **AMG Sport Brakes**

*Standard on E 53 (E 53 only)*

4-piston front and 1-piston rear calipers

- Front axle: brake disc measuring 14.6 inch, internally ventilated and perforated with 4-piston fixed caliper
- Rear axle: brake discs measuring 14.2 inch, internally ventilated 1-piston floating caliper
- Grey-painted brake calipers with “AMG” lettering

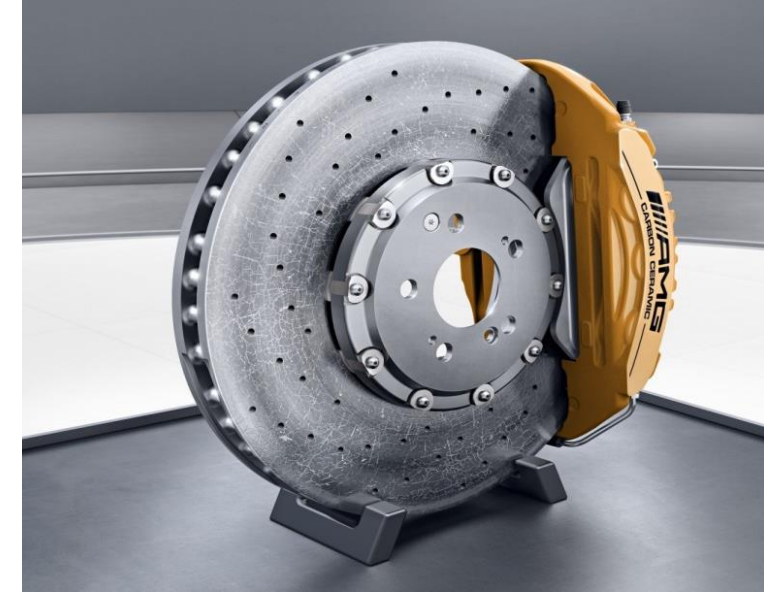

### **AMG High-Performance Composite Braking System (U70)**

*Standard on E 63 S (E 63 S only)*

6-piston front and 1-piston rear calipers

- Front axle: composite brake disc measuring 15.4 x 1.4 inch, internally ventilated and perforated with 6-piston fixed caliper
- Rear axle: brake discs measuring 14.2 x 1.0 inch, internally ventilated and perforated with 1-piston floating caliper
- Increased fade resistance and reduced thermal deformation of brake discs
- Red-painted brake calipers with “AMG” lettering

### **AMG High-Performance Ceramic Composite Braking System (B07)**

*Option price: \$TBA (E 63 S only)*

6-piston front and 1-piston rear calipers

- Front axle: composite ceramic disc with a diameter of 15.8 x 1.5 inch, internally ventilated and perforated, with 6-piston fixed caliper
- Rear axle: integral brake disc with a diameter of 14.2 x 1.3 inch, internally ventilated and perforated with 1-piston floating brake caliper
- 40% weight savings compared to conventional brake discs
- Bronze-painted brake calipers with “AMG Carbon Ceramic” lettering

## Advisory on B07 AMG High-Performance Ceramic Compound Braking System

The AMG Ceramic Composite Braking system has numerous benefits – namely, it is 40% lighter than a conventional steel braking system, offers significantly longer service life for the brake rotors, and provides exceptional resistance to brake fade under repeated aggressive stops.\*

The materials in your AMG Ceramic Compound Braking system were derived from Formula One technology, and therefore will perform differently than conventional brakes.

Especially when cold, this ceramic composite material will resonate during braking and potentially feel less responsive under light brake pressure but with no loss in braking power. You will hear sounds, e.g. squealing, that you might not expect and which may be louder than what you are used to during ordinary everyday braking maneuvers – rest assured that this is a normal operating characteristic for this brake system, and is a by-product of the unique properties of the material. Mercedes-AMG recommends that the driver engage the brakes in an assertive manner in order to mitigate some of this noise during normal operation; Mercedes-AMG also recommends that the brakes be brought up to operating temperature before use in high-performance driving situations in order to improve braking performance.

*\*Brake weight based on AMG Germany official measurements, Service life based on F1 Safety car longevity and is dependent on individual driving style and conditions and will vary. Brake pads and rotors should be regularly serviced to ensure proper wear. Please reference your Mercedes-AMG Maintenance Booklet or contact your dealer for scheduled intervals.*

## *Steering Wheels*

**AMG Performance Steering Wheel in Nappa Leather (L6J)**

*Standard*

- The AMG Performance Steering Wheel in Nappa Leather is especially sporty with easy grip, providing genuine racing flair.

**AMG Performance Steering Wheel in Nappa Leather / DINAMICA (L6K)**

*Optional*

- Sporty design and unique touch & feel make the AMG Performance Steering Wheel an unmistakable feature in Nappa Leather with the grip area in DINAMICA.

**AMG Performance Steering Wheel in Nappa Leather / Black Piano Lacquer (L6L)**

*Optional; Requires H64, H40 or H16 trim*

- The combination of leather with Black Piano Lacquer or Leather with high-gloss Black Poplar Wood makes the steering wheel a highlight in terms of its look and feel.

**AMG Performance Steering Wheel in DINAMICA (L6G)**

*Optional; not available with DB0 or 443; must have U88.*

- For an even better grip during sporty maneuvers, the AMG Performance Steering Wheel with flattened bottom section is fully trimmed in DINAMICA.

## *Steering Wheels*

**AMG Performance Steering Wheel in  
DINAMICA / Carbon Fiber (L6H)**

*Optional*

- For an even better grip during sporty maneuvers, the grip area on the AMG Performance Steering Wheel in Carbon Fiber is finished in DINAMICA.

## AMG Performance Seats (555): \$2,500

## AMG Performance Exhaust System (U78)

### **AMG Performance Exhaust System (U78)**

*Option price: \$1,250*

*Standard on E 63 S*

- Stronger differentiation of the sound characteristics by means of two additional exhaust flaps
- Sound characteristics dependent on selected drive program – clear differentiation between rich in drive programs “C” and “S” and emphatically sporty in drive programs “S+” and “Race” (*“Race” mode on E 63 S Only*)
- Additional control of the sound characteristics by means of a button in the middle control panel of the center console
- Control by means of variably adjustable exhaust flaps – without loss of power
- Control of the exhaust gas flaps is dependent on both engine speed and load, ensuring 100% power delivery
- Double declutching (in “S”) and a misfire (in “S+” and “Race” emphasize the sporty characteristics of the particular drive programs (*“Race” mode on E 63 S Only*))

## *AMG Night Package (pictured on the E 63 S) (DC1) E 63 S: \$750; E 53: \$650*

Window trim strip in high-gloss black

AMG rear apron trim in high-gloss black

Black chrome-plated twin tailpipe trim elements

Mountings on the louvres of the outer air intakes in high-gloss black

A-wing in high-gloss black

Lamella grille in silver chrome

## AMG Exterior Carbon Fiber Package I (DE7) - E 63 S Only: \$TBA

Carbon fiber inserts in AMG side sill panels

Carbon fiber insert in rear apron above rear diffuser

A-wing in carbon fiber

Lamella grille in silver chrome

***AMG Exterior Carbon Fiber Package II (DC4) on all models (E 63 S shown): \$1,750***

AMG carbon fiber rear spoiler

AMG carbon fiber exterior mirror covers

## AMG Track Pace

### AMG Track Pace

Standard on E 63 S; \$250 on E 53

AMG TRACK PACE transforms your AMG vehicle into your virtual race engineer. With the aid of lap, sector and acceleration times plus selected live telematics data you can analyse and improve your driving skill on cordoned-off tracks in a targeted manner.

In order to determine as precise a position as possible, AMG TRACK PACE works with a specially programmed algorithm which combines vehicle data such as wheel speed, steering angle and yaw rate with the satellite-aided GPS positioning system and updates every 50 milliseconds (20 Hz technology). This makes position measurement significantly more precise than with external applications such as third-party-provider apps on a smartphone.

In order to record and continually improve your individual performance, recorded data such as lateral and longitudinal acceleration, accelerator and brake pedal position or steering angle are used. All values are clearly depicted and can be read out directly in the vehicle. Fast or slow laps can be noted from the corner of the eye thanks to various colour displays.

As well as recording drives on circuits or public routes, AMG TRACK PACE can also be used to record accelerations such as from 0 – 60 mph or over a quarter mile, plus deceleration values. Measurement with AMG TRACK PACE starts automatically when driving off or in deceleration mode when falling below a certain speed.

AMG TRACK PACE stores individual laps and sprints in the vehicle database. You can determine a reference time and compare your current drive with it – down to the last centimeter. This saves you any heavy and difficult to use additional equipment for analysing your driving data.
