# Visual Equipment Differentiation

## Steering Wheels

### Steering Wheel in Black Nappa Leather

- Standard on G550
- Available with all trims
- The multifunction steering wheel in black Nappa leather enhances driving comfort and ease of operation. It features 12 function keys for operating the display menus in the instrument cluster and for controlling the radio volume

### VL0 – Heated Steering Wheel in Black Nappa Leather

- Optional on G550: **\$250**
- Available with all trims → independently from the trim the steering wheel is in black Nappa leather
- The steering wheel heating is switched on with a rotary switch on the multifunction steering wheel. A heat mat inside the multifunction steering wheel heats up the steering wheel rim to a temperature of 99 °F, and then goes into regulating mode, meaning the temperature oscillates between 93°F and 100°F

### ZT1 – *designo* Wood/Leather Steering Wheel in Black Piano Lacquer

- Optional on G550
- Only in conjunction with *designo* Black Piano Lacquer Trim (ZG2) and AMG Carbon Fiber Trim (ZG6)

## Visual Equipment Differentiation

### Steering Wheels

#### VK1 – Steering Wheel in Leather/ Burl Walnut

- Optional on G550
- Only in conjunction with Burl Walnut Trim (V56)

#### ZT2 – *designo* manufaktur Two-Tone Nappa Leather Steering Wheel

- Optional on G550: **\$700**
- The two-tone steering wheel in Nappa leather enhances the attractive and luxurious look of the two-tone interior. The upper and lower section of the steering wheel rim are finished in *designo* leather matching the color of the dashboard lower section. The grip surfaces on the steering wheel are in black.
- Only in conjunction with Two-Tone Interiors (ZI2)

## Product Highlights: V-8 Engine

G550 Only

The M176 is a gas engine with twin turbocharging and hot inside 'V'. It is based on the new generation of the V8 engine family from AMG. The company already successfully introduced it as the M178 sports car engine (dry sump) in the Mercedes-AMG GT and as the M177 in the Mercedes-AMG C 63. The M177 has been comprehensively modified and is being used for the first time in the Mercedes-Benz G 500 as the M176.

- 416 hp (34 hp increase from MY15 G550)
- 450 lb-ft. (59 lb-ft. increase from MY15 G550)

## Product Highlights: Adjustable Suspension

Optional for G550

With the adjustable damping, at the touch of a button the driver can choose between the two damping programs of "Comfort" and "Sport" for on-demand shock absorber force. The Comfort setting is available as the standard setting. In addition, depending on the driving situation, ESP® is able to select harsh characteristics independently of the driver's requirements. This requirement occurs in order to make the vehicle more stable in dynamic driving situations and delay intervention in terms of the engine management system or brake actuation. The driver's requirements are retained when ESP® is deactivated.

## Product Highlights: Distance Pilot DISTRONIC

Standard on all models

When the system is activated using the familiar cruise control stalk (governed range from 19 to 124 mph, and from 0 to 124 mph if a vehicle is detected ahead), a radar sensor calculates the distance between the source vehicle and the vehicle in front, computes the necessary vehicle deceleration or acceleration, and transmits this information to the control unit. This control unit then governs engine output, applies the brakes or changes gear to help keep the vehicle at the set safe distance when approaching a slower vehicle in front. The degree of automatic deceleration is limited, partly to avoid endangering the traffic behind, and an audible warning is sounded if necessary to instruct the driver to take action (e.g. apply the brakes). If DISTRONIC detects that the vehicle ahead is coming to a stop, it brakes the vehicle to a halt. In such cases, the system is switched off and can subsequently be reactivated, provided the vehicle is within the governed speed range.
