## Smartphone Integration for Apple CarPlay™ and Android Auto (868)

### **Smartphone Integration - Apple CarPlay™ and Android Auto**

*Requires Smartphone Integration Package (868)*

Smartphone Integration makes safe use of mobile devices possible while on the move. The connection to the smartphone allows access to up-to-date software and data such as navigation and traffic information, media (Streaming Media and IP Radio) as well as contact data and messaging. To prevent driver distraction while on the move, there is no complete duplication of smartphone content. A data connection via the mobile phone is necessary for certain functions. Corresponding charges may be incurred depending on the mobile phone contract. The functions supported also depend on the smartphone. The information provided by the smartphone manufacturer will also indicate the compatible devices and functions.

## Telescopic Cargo Rods (895)

### **Telescopic Cargo Rods (895)**

*Available All Models*

This clever solution enables the luggage compartment to be divided up flexibly and helps to prevent the load from sliding around. The floor brackets can be positioned freely along the outer edges of the load compartment floor. The system's plug-in elements and telescopic rod are secured in these brackets to provide a secure hold. Purchasing the supplementary kit enables additional products, such as the zig-zag folding bag for example, to be optimally secured.

### **Features of the luggage compartment plug-in module:**

- 1 telescopic frame
- 2 plug-in elements
- 2 bracket elements

## Cargo Protection and Sill Guard (942)

### **Cargo Protection and Sill Guard (942)**

*Available All Models*

The Cargo Protection and Sill Guard is a reversible mat, with one side in high-quality velour and the other in a rubberized, anti-slip material, which provides protection for the load compartment floor. The folding zigzag load sill guard, which is attached with Velcro, can fold out over the rear bumper to help prevent clothes becoming dirty or paintwork from being scratched during loading and unloading.

## ***Ski and Snowboard Bag (282)***

---

### **Ski and Snowboard Bag (282)**

*Available All Models*

The ski and snowboard bag is ideal for transporting skis and snowboard – without having to install a ski rack or soil the interior. Up to four pairs of skis or 2 snowboards can be conveniently stored in the bag and removed via the luggage compartment. Thoughtfully designed, there is no impairment of seating comfort in the front seats or for the two outer rear seats. After sliding the bag in place, it can be secured safely in the rear by means of a retention device. It is also fitted with a soft armrest for the rear passengers. Accessories and small items can be conveniently stored in the external and internal pockets. Once filled, the ski and snowboard bag is easy to pull along to the ski lift thanks to the built-in pair of roller wheels and a pull-out handle.

#### **Features of the ski and snowboard bag:**

- Internal and External pockets
- Armrest
- Built-in pair of roller wheels
- Pull-out handle
- Condensation drain and ventilation
- Retention device

## *Steering Wheels*

### **Sport steering Wheel**

*Option price: \$0*

*Not available with 224 and 225 upholstery*

The 12 ergonomic control buttons on the leather multifunction sport steering wheel with flattened bottom section enable operation of the display menus in the instrument cluster and the Audio/COMAND display on the left. On the right, the driver can control the volume of audio devices, telephone and navigation system. Silver-colored aluminum shift paddles emphasize the sporty appeal.

### **Heated Steering Wheel (443)**

*Option price: \$250*

*Not with 224 & 225 upholstery*

On cold days, heating of the steering wheel rim very rapidly ensures cozy temperatures of the grip area and thus also warm hands. The temperature oscillates around 95°F.

## AMG Track Pace App for Apple iPhone® (255)

### AMG Track Pace App for Apple iPhone® (255)

Option price: \$XXXX

Requires Multimedia Package (320)

With the "AMG Track Pace" app, a smartphone can be turned into a personal racing engineer. This enables lap/sector times or even videos to be recorded and analyzed. Another attractive feature is the option to exchange data with other AMG drivers e.g. via social networks.

Overview of the AMG Track Pace app:

- Stores vehicle-specific data (e.g. speed, acceleration) as well as lap and sector times
- Video recordings via smartphone/GoPro are also possible
- Driving ability can be analyzed and improved in a targeted manner
- Connection via WLAN
- Exchange data with other AMG drivers via social networks such as Facebook (Share function) or the AMG Private Lounge
