Function group	54.10 - Battery, power supply, voltage converter
Date	1/24/24
Validity	254 All
Reason for change	Remedy change

Complaint

Customer states CEL is on.

Cause

Quick test shows FC POA7F00 The state of health limit of the hybrid/high-voltage battery module has been reached.

No drivability concerns occurred and vehicle drives as normal.

Remedy

Do not replace any parts!

This fault can be ignored.

A SW solution is in development at this time.

Best Practice:

Perform a tele diagnosis (if available).

If P0A7F00 is the only fault stored, advise the customer there are no drivability concerns related to the fault code and they can continue driving.

Symptoms	Power generation > Engine management > Display message > Parameter setting false
	Overall vehicle > Power supply > Battery/On-board electrical system > Battery/on-board electrical system indicator lamp > Battery charge indicator/consumer shutoff > Illuminates red
