Besides improved fuel economy, handling and safety, what do these measurements mean?

 **CASTER** is the tilt of the axis that the wheel steers around. It affects how the vehicle tracks as you drive down the road and can affect handling.

 **CAMBER** is the angle of the tire in relation to the road surface. It affects tire wear, and handling when turning.

 **TOE** is a measurement of how much the wheel is turned in or out from a straight-ahead position. It affects tire wear, handling and can make your steering wheel crooked.

Your vehicle has been aligned using a precision **Diabo** wheel aligner
