Transparent Hood (Standard)

When the off-road mode is active, the central display shows a virtual view under the front of the vehicle, including the front wheels and their steering position. The view is composed of the images from the 360-degree camera. There are two views: under the vehicle and the images ahead. At speeds up to 5 mph the "transparent hood", i.e. the view under the vehicle, is shown. From 5 to 12 mph the system shows the view ahead. The camera image is switched off at higher speeds.
