Enjoy contactless ease of operation: this innovative system detects and interprets your hand and arm movements. As such you can activate selected functions in a matter of seconds. As part of this the system is able to differentiate between driver and front passenger – so that you reach precisely the menus you wish to use.

- 3D camera in the overhead control panel, proximity sensors near the media display and touchpad
- The system detects and interprets hand movements and as part of this differentiates between the driver and front passenger
- Specifically highlights certain elements in the media display or enlarges them (media/radio, seat adjustment, navigation or Active Parking Assist)
- Activate reading lamp – move hand up and down beneath rear-view mirror
- Activate search light – stretch hand out towards the unoccupied front passenger seat
- Call up the personal favorites menu – defined gestures, form a "V" using index and middle fingers

## Mercedes-Benz User Experience (MBUX)

### MBUX - the newest headunit generation from Mercedes-Benz

Standard on all A-Class models

- Offered with two 7" digital displays as standard equipment
  - Optionally, these displays can be upgraded to two, bonded 10.25" displays
- MBUX was designed for a touch interface with intuitive operation
- There are four ways of interacting with the system:
  - An all-new Touchpad, Touch Control Buttons on the steering wheel, a touchscreen center display, and an all-new generation of Voice Control
- Multiple users can set up Profiles which save their settings for future use
  - Including: seat settings, music preferences and radio settings, phone settings, themes/moods, Bluetooth connections, etc.
- Over time, the system learns more about it's owners and creates Suggestions based on past behavior of the user
- Whole groups of settings can be saved together in the form of a Theme/Mood
  - Including: ambient lighting, climate control, music preferences, and setup of the Digital Instrument Cluster and headunit display, etc.
- Using over-the-air updates, MBUX can continuously be improved over time
- The system is very quick and responsive due to it's impressive graphics processing and computing power

## Voice Control

### The most advanced Voice Control in any Mercedes-Benz vehicle

Standard on all A-Class models

- Voice Control with MBUX is greatly enhanced over other systems by using both an onboard and offboard system for voice recognition
  - This ensures quick and appropriate responses
- The system also uses Natural Language Understanding so there's no need to remember the order of words for a specific command, just talk to the voice assistant as you would speak to another person
  - There are many ways of saying the same thing: *"Take me to Starbucks"*, or *"Find a Starbucks nearby"*, or *"Is there a Starbucks close?"*, or even *"I need a coffee"*
- Indirect commands can also be given like *"Will I need an umbrella today?"* and the Voice Control system understands that the user is really asking whether it will rain today
- In-vehicle components can also be controlled via Voice Control, like seat heating, climate control, ambient lighting, massage programs, and even the sunshade for the Panorama roof!
- Voice Control is also capable of learning from its users and adjusting its understanding to their specific way of speaking
- Keyword Activation ensures you can quickly interact with Voice Control without having to press the button on the steering wheel
  - The system wakes up with a simple *"Hey Mercedes"* or *"Hi Mercedes"*
