 - There are many ways of saying the same thing: "Take me to Starbucks", or "Find a Starbucks nearby", or "Is there a Starbucks close?", or even "I need a coffee"
- Indirect commands can also be given like "Will it need an umbrella today?" and the Voice Control system understands that the user is really asking whether it will rain today
- In-vehicle components can also be controlled via Voice Control, like seat heating, climate control, ambient lighting, massage programs, and even the sunshade for the Panorama roof
- Voice Control is also capable of learning from its users and adjusting its understanding to their specific way of speaking

9G-TRONIC Automatic Transmission (421)

9G-TRONIC Automatic Transmission (421)

Standard on all GLE models

9G-TRONIC – faster, smoother, and more efficient

Featuring nine forward gears, this automatic transmission takes efficiency, comfort and dynamism to a completely new level. It is the new generation 9-speed automatic transmission with hydrodynamic torque converter. The larger ratio range allows a reduction in engine speed. Performance remains excellent while ride comfort is enhanced and noise levels are reduced. The reduced intervals between the gears lead to faster gear changes and enhanced spontaneity and agility. At the same time, the 9G-TRONIC transmission impresses with smooth, barely perceptible gear shifting like that of a continuously variable transmission. As the 9G-TRONIC transmission is able to skip individual gears, multiple downshifts are possible for fast and powerful sprints.

PRE-SAFE Sound

PRE-SAFE Sound

Standard on all GLE models

Part of PRE-SAFE, PRE-SAFE Sound is an acoustic occupant preconditioning system which can reduce the effects of the noise from an accident on the occupants hearing.

- When the PRE-SAFE system recognizes a certain dangerous situation, the onboard sound system plays a brief rushing sound, also known as "Pink Noise", to precondition the hearing
- The natural reflex mechanism of the stapedius muscle enables the inner ear to rapidly prepare for the accident-induced high pressure sound
- Up to 40% reduction of noise exposure impact

Active Brake Assist

Active Brake Assist

Standard on all GLE models

- Radar-based driving assistance system that can help prevent accidents with vehicles ahead and with crossing pedestrians or mitigate the consequences of accidents
- Combination of proximity warning, collision warning, on-demand braking assistance and autonomous braking function

- Initiation of autonomous braking if the driver fails to react
- Visual and audible warning plus almost simultaneous emergency braking if an impending collision with a crossing pedestrian is detected

It can now unlock the doors when the vehicle is stationary to allow first responders immediate access to the vehicle's interior
- Active Lane Change Assist is a radar-and-camera-based system that aids the driver when changing lanes. When a turn is indicated, this feature will aid with steering into the adjacent lane if it detects the lane is empty
- Active Speed Limit Assist can adapt vehicle speed to identified speed limits and can now adjust preemptively when speed limits are going to change
- Route-Based Speed Adaptation is able to reduce the speed in anticipatory mode by referencing the vehicle's map data ahead of bends, junctions, roundabouts, toll booths and exit ramps
- Active Brake Assist with Cross-Traffic Function
- Evasive Steering Assist this system assists by adding calculated steering torque to aid in steering wheel movement when a driver deliberately or instinctively performs an evasive maneuver around a pedestrian
