

How to Change light bulb for front marker light for GLK 350

Open the hood. In this demonstration, the front left marker light is being replaced.

Push in the tab and pull off the black cover.

Black cover is now removed.

The black knob that holds the bulb for the front marker light is at the top outside corner of engine bay. Turn this knob counter-clockwise and pull the knob out.

The knob has the bulb at the other end of the knob. Pull the bulb straight out and replace with new bulb.

Go in reverse order to put all back together.
