

## **OPERATION MANUAL (ONE-FUNCTION MODULE):**

- **DO NOT START THE MOTOR**
- **Do not put foot on brake - hit START BUTTON ONCE - Head Unit will come on**
- **Hit Start button 2nd time - dash lights will come on**
- wait until audio head unit totally booted
- plug module to the diagnostic socket under the dash (also called OBD2)
- observe your audio head unit screen for messages
- you will see "waiting..." message in about 20 seconds
- then you will see HWID: xxxxxxxx - which shows your audio head unit serial number
- then you see message "Succesful, xxxxxxxxx"
- Audio head unit will then reboot -
- Once head unit reboots - this means activation finished
- remove module from diagnostis socket
