Work as Advertised

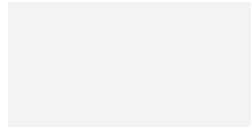

April 2, 2015

Verified Purchase

Product worked as advertised. Was able to determine I didn't have an exhaust restriction. I didn't have enough room to screw the hose into my rear O2 sensor bung so I purchased an adapter. My catalytic converter runs close to my CV axle on my Focus SVT.

My advice, check your exhaust for clearance issues and get an adapter beforehand to save future

frustration.

Perfect function, good price.

April 22, 2018

This worked perfectly (you want a dedicated exhaust backpressure gauge, because most other pressure gauges are not sensitive enough) and the long hose made it possible to sit in the vehicle and rev the engine while still being able to see the gauge. Takes ALL the guess work out of chasing possible exhaust restrictions. Worth every penny.

Not designed well

August 21, 2017

Verified Purchase

The end that screws into the exhaust does not have a swivel so you have to grab the gauge and turn the hose and everything in order to screw it in. This is only a problem in restricted areas, but that is mostly what this tool is used for, thus making it very unhandy! They should at least make a right angle adapter to make it possible to get in the tight spots.

Great tool to have in your arsenal

February 10, 2019

Verified Purchase

So my car was acting up and would not accelerate more than 15 mph. Bought this tool because a buddy told me that the Bonneville's had an known problem with the plugged cats. Took me less than 15 minutes to diagnose a plugged cat. Bought this tool for 1/2 the price the shop wanted to do the same thing.

Good tester. It read 4

June 22, 2016

Verified Purchase

Good tester. It read 4.5 PSI before the Cat. Convert. and 0 PSI behind the Cat. (1.5 PSI recommended) So it's time for a replacement. It's well worth the money for the tool to be sure.

Works great.

August 23, 2018

Verified Purchase

I read some other reviews and made sure not to run my engine long enough to let heat build up at

the O2 sensor holes I was testing and melt the rubber hose. No problems using the gauge; I could easily see one side of my exhaust is blocked and the other side wasn't.

Does the job

February 10, 2019

I use an o 2 sensor 90 degree extension spacer with jam nut to access hard to reach bung holes. The 360 degree rotation of the extension makes screwing in the hose and gauge soooo much easier.

Good tool, Adapters fit perfect

July 3, 2017

Verified Purchase

Worked great. Had no problems with the fittings, came with 2 adapters. The threads on fitting are the same size for an o2 sensor that uses a 22 mm wrench but the nut is a smaller size on the tool fitting. Maybe its the problem some people had. I just tightened it by hand with no leaks or issues.
