Order number		License plate	

Complete list of fault codes

P1000	Control unit N15/5 (Electronic selector lever module control unit) is defective.
P1750	The supply voltage of the control unit is too low (undervoltage).
P1817 - [1]	Component Reversing lamp has a short circuit to ground.
P1817 - [2]	Component Reversing lamp has a short circuit to positive.
P1817 - [3]	No supply voltage at terminal 15 for reversing light.
P1832	The output stage in control module N15/5 (Electronic selector lever module control unit) has Short circuit.
P1833	The output stage in control module N15/5 (Electronic selector lever module control unit) has Open circuit.
P1856	Selector lever position detection has failed.
P1860	The right rear wheel rpm signal sent from the traction system via the CAN bus is implausible.
P1861	The left rear wheel rpm signal sent from the traction system via the CAN bus is implausible.
P1875	CAN communication with other control units installed in this vehicle is not possible.
P1876	The signals sent by control unit N47 (Traction systems control module) for the wheel speeds and the braking torque are not available on the CAN bus.
P1910	The supply voltage of the control unit is too high (overvoltage).
P1912	The pushbutton signals are implausible.
P1925	The braking torque value sent from the traction system via the CAN bus is implausible.
P1926	The stop lamp feedback transmitted by control unit N73 (EIS [EZS] control unit) over the CAN bus is not available.
P1927	The braking signal sent from the traction system via the CAN bus is implausible.
P1928	The brake signal from control unit N47 (Traction systems control module) is not available on the CAN bus.
