

Innovation: Parking Package with 360° Camera

Standard on all models (Includes PARKTRONIC with Active Parking Assist)

Details

Makes parking easier due to assistance in maneuvering and supports the driver with detection of suitable parking spots.

With this system the driver is able to:

- Recognize obstructions and bypass them easily
- Register important areas that are out of view
- Optimize the parking process

360° Camera System:

- Four digital cameras (front bumper, mirrors and rear view backup camera) combine to create a 360° overview
- Photographic image of the vehicle's environment
- Static and dynamic guiding lines show the vehicle dimensions and distance information
- Fade-in of additional information from PARKTRONIC sensors
- Top-View, Split-View and full screen available
