This is Mercedes-Benz S-class V221 / W221 VIN decoder. Every Mercedes-Benz car has a unique identifier code called a VIN. This number contains vital information about the car, such as its manufacturer, year of production, plant, type of engine, model and more. For instance, if someone wants to buy a car, it is possible to check the VIN number in on-line database to ensure that the car was not stolen, damaged or illegally modified. The VIN number has a specific format, which is globally recognized. This format was implemented by the ISO institute. Every car manufacturer is obliged to mark all its vehicles in this special format. This online service allows the user to check the validity of the car and get detailed information on almost any VIN number, search Mercedes-Benz S-class V221 / W221 car parts and check the car's history. The VIN also allows the user to check the market value of new or used Mercedes-Benz S-class V221 / W221.

Please enter VIN number:

Id	<b>200359496</b>
Name	<b>Driver Assistance Package</b>
Description	<b>Distronic Plus with Pre-Safe Brake System, which consists of a radar that monitors the vehicle ahead and adjusts speed accordingly. If the car ahead slows down or stops, the Pre-Safe Brake System engages up to 40% of available brakeforce. If the brakes have not been applied within 0.6 seconds of calculated impact, the system will then apply 100% brakeforce, with the intended effect of reducing impact severity. An audio/visual warning will be triggered if the system determines the driver is not braking hard enough to prevent colliding into the vehicle ahead; Active Blind Spot Assist, which engages above 18 mph and alerts the driver with a red hazard signal in the side mirrors if a vehicle is entering the blind spot area. Also, if the turn signal is activated and the system senses a vehicle in the blind spot, an audio warning is triggered; Active Lane Keeping Assist, which monitors the proximity of the car relative to the lane markings on the road and monitors the driver's activities. If the system senses that the car may be drifting out of the lane, Lane Keeping Assist delivers a series of vibrations through the steering wheel to alert the driver.</b>
