

Providing premium car emission products to the American market

## Catalytic Converter & DPF Specialists

**W&L Incorporated is a provider of premium and high quality car emission products.** We work with a manufacturer in the European Union (EU) to bring our customers an expanding inventory of catalytic converters and diesel particulate filters (DPF).

**Started by two European car enthusiasts based out of Maryland, W&L's main focus is to provide premium car emission products to the American market at a competitive price.** We constantly work toward expanding our inventory to meet the demand of our customers and market trends.

### **Premium EU Manufactured Products**

W&L works closely with our manufacturer to ensure the best materials, direct-fit, and performance maintained while matching the auto manufacturers specifications. Our manufacturers guarantee they use the highest-grade steel, ceramics, and precious metals, to construct the catalytics and DPFs. Paired with in house research and development, this results in parts that meet Original

Equipment Manufacturer (OEM) performance and fitment at competitive prices.

**Our manufacturer is International Standard Organization (ISO) 9001:9002 and TUV Certified -** confirmation that our cats and DPFs are made with the best materials and craftsmanship available.
