**SUBJECT: Model 221.171/176/177/179/186 (with Option Code 223 or 223+224)
Rear Seat Belt Comfort Fit and/or Head Restraint Raising Mechanism Not
Functioning When Fastening Seat Belt**

If you receive customer reports in the above model vehicles of the rear seat belt comfort fit and/or head restraint raising mechanism not functioning when fastening seat belt, the wiring from the buckle may be damaged. To resolve, perform the following procedure.

1. Remove seat belt buckle. Refer to WIS document AR91.40-P-1516SX.
2. Secure the wiring on the replacement buckle using fabric tape as shown in (Figure 1).
3. Install in reverse order.

Note: The wiring has been secured in production from December 2005.

This bulletin has been created and maintained in accordance with MBUSA-SLP S423QH001, Document and Data Control, and MBUSA-SLP S424HH001, Control of Quality Records.
