

MODEL 211, 215, 217, 220, 222, 230, 231, 240

211 589 02 21 00

Adjusting tool set

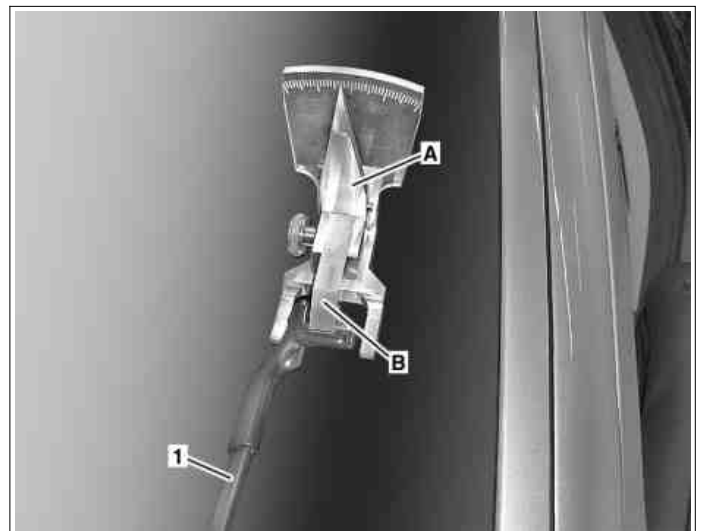

- 1 Remove adapter (B) and angle gauge (A) from the adjustment tool set.
- 2 Insert adapter (B) into the guide (arrow) of the angle gauge (A) and fasten with the screw/bolt to angle gauge (A).

P82.30-2301-11

Driver-side wiper arm (1) in reversing position

- 3 Slide adapter (B) with the angle gauge (A) onto the wiper blade mount of the driver-side wiper arm (1).
- 4 Lower driver-side wiper arm (1) until all three jacking points of the angle gauge foot (A) touch the windshield.
- 5 Read angle of incidence of driver-side wiper arm (1) on the dial of the angle gauge (A) and record.
- 6 Lift driver-side wiper arm (1) and remove angle gauge (A).
- 7 Repeat testing procedure for passenger-side wiper arm.

P82.30-2302-11

Shown on model 211

- 8 Raise driver-side wiper arm (1) and passenger-side wiper arm, cover up using suitable aids (scratch protection) and place on windshield.

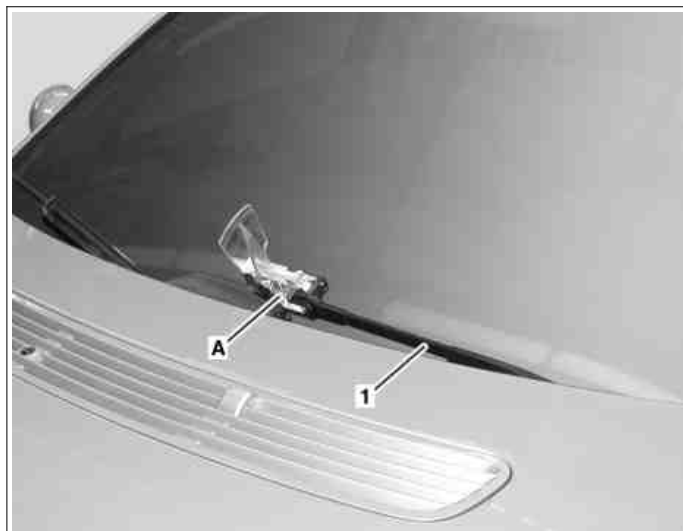

ⓘ When changing from reversing position to parked position, make sure that driver-side wiper arm (1) and passenger-side wiper arm do not make direct contact with windshield. Otherwise, the windshield may be scratched.

Driver-side wiper arm (1) in park position

- 10  Slide angle gauge (A) onto the wiper blade mount of the driver-side wiper arm (1).
- 11 Lower driver-side wiper arm (1) until all three jacking points of the  angle gauge foot (A) touch the windshield.
- 12 Read angle of incidence of driver-side wiper arm (1) on the dial of the  angle gauge (A) and record.
- 13  Remove choke angle gauge (A) from driver-side wiper arm (1).
- 14 Repeat testing procedure for passenger-side wiper arm.

Shown on model 211

- 9 Switch on ignition (circuit 15 or circuit 15R), allow windshield wiper system to move back to park position, switch off ignition and remove aids (scratch-protection) from driver-side wiper arm (1) and passenger-side wiper arm.
