

2016 S-Class Coupe Dealer Ordering Guide

Last Update: March 23, 2015

An important note about this Guide:

The information presented in this guide is based on the most current information available and is intended to assist you when specifying your orders. Pricing may not yet be finalized for some models or options.

Due to variances among monitors and printers the colors that appear on your screen and printouts may not be exact.

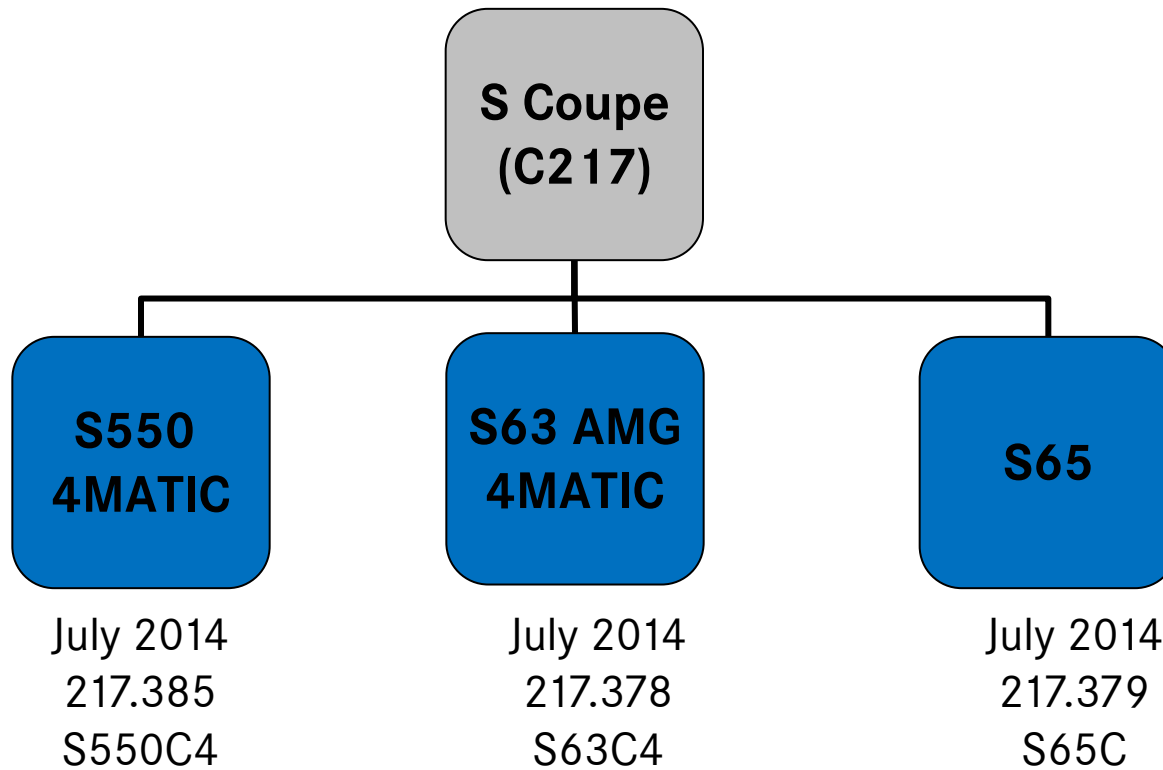

For illustrative purposes, some images may be of European Specification vehicles.

Requires 610 Night View Assist

Part of 445PKG or stand-alone

Reduces trunk space, removable

Requires 463 Head-Up Display

Select when ordering *designo* uphol.

Feature Highlight: Swarovski Crystal Headlamps (5U5)

\$1,750

Requires: 610 Night View Assist PLUS

Features of the LED Intelligent Light System with Swarovski crystals:

- Total of 47 crystals per headlamp
- Indicators each with 30 Swarovski crystals
- Daytime running lamps each with 17 Swarovski crystals
- Illuminated "Mercedes-Benz" lettering
- Swarovski crystal accent on center cupholder cover

Feature Highlight: Heated Windshield (597)

\$550

Requires: P01 Package

Heated windshield at a glance:

- This option does not change the appearance of the windshield (no lines)
- Activated using the climate control's Defrost button when the engine is running
- Heating integrated into the windshield means there is no need to scrape the windshield in cold weather
- Thaws the ice in around 3.5 minutes so that it can easily be removed with the windshield wipers
- Scratching of the surface is prevented as no ice scraper is needed
- The climate control system is configured to assist the thawing process

Technical Details

- A 42-volt DC/DC converter is required to heat the windscreen with infrared coating. A silver-print busbar, activated with 42 volts, is integrated at both the top and bottom of the laminated glass. Non-conducting apertures and lasercut windows ensure homogeneous thawing. Thanks to an output of 900 watts, an iced-up windscreen is thawed sufficiently after around 3.5 minutes so that remaining ice particles can be easily removed by the wipers.

Feature Highlight: MAGIC SKY CONTROL (398)

\$2,500

MAGIC SKY CONTROL

- Large, single-section glass module covering 2/3 of the roof area
- Glass transparency controllable via switch in overhead control panel: Change from dark to transparent and vice versa within just a few seconds
- When the glass is transparent: clear view of the sky and a particularly light atmosphere
- When the glass is dark: effective means of reducing heating of the interior by up to 18 degrees
- The power sunshade for the roof is retained even with this option

Technical Details

- Several films are sandwiched between the panoramic roof's two glass sheets. Between these films is an emulsion containing particles that align themselves with the electric field when an AC voltage is applied. When the voltage is switched off, the particles arrange themselves randomly and prevent most of the light from passing through. The glass remains dark. When an AC voltage of 120V is applied, the particles align themselves in the electrical field and allow the light to pass through the glass. The glass becomes transparent.

S550 4MATIC Coupe Technical Highlights

- 4.7L V8 biturbo engine
- 449 hp @ 5,250 – 5,500 rpm
- 516 lb-ft torque @ 1,800 – 3,500 rpm
