

**"Mercedes Paddle Converter" (Ver 1)**

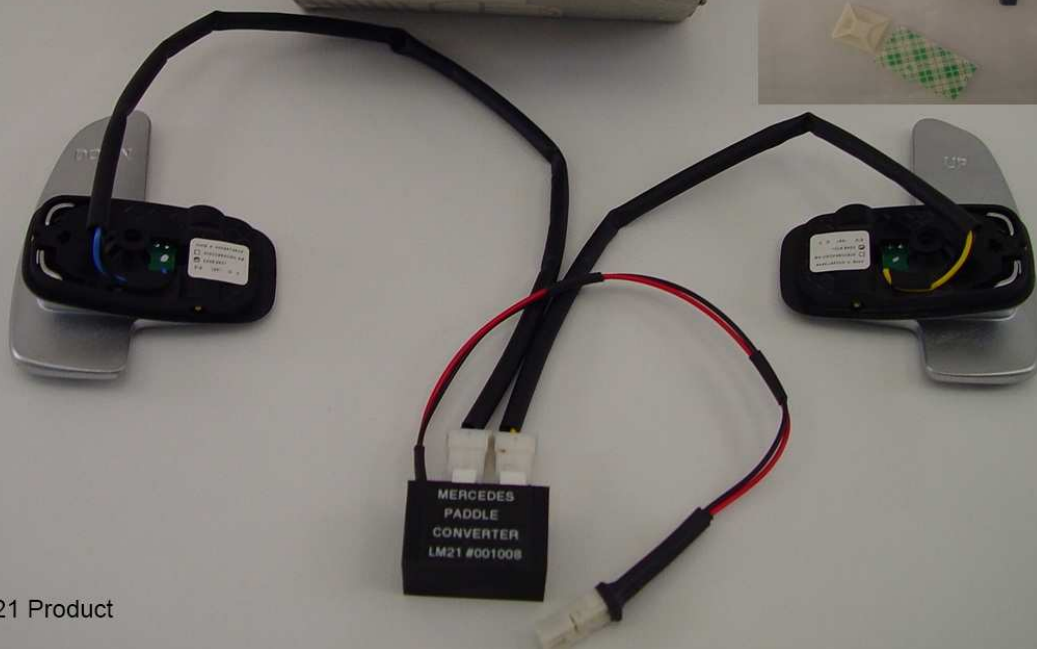

Controlled by the new AMG Paddles ( A 171 267 00 46), this plug and play module works by electronically simulating the outputs of the Early AMG buttons. It replaces ....

**SL55 and CLK55 buttons  
870273-0000 & 870273-0001**

**2 Pin Connector  
(plugs into clockspring)**

**E55 buttons  
870273-0002 & 870273-0003**

Module is available with  
or without AMG paddles

Paddles can be plugged into EITHER 3pin header.

Notice orientation of AMG paddle connectors while viewing module from non-Label side. When installed properly, metal is visible through windows in connector.

Modules come supplied with 3M double adhesive backed foam, an adhesive backed cable tie mount, and cables ties. Secure Module in wheel using any combination of these.

2 Pin Connector of module plugs here (where old buttons were plugged in)

Clockspring connections as viewed through wheel
