DIY For Coding Out ABC on R230 Cars :

• To do this, you need a Star with Developer mode. Hook up SDS to your car and when it reads your car, select Control Units, pick Information and Communication and you will see ICM :

nformation and communication			Control unit	CGW	v voltage: 12.4 v O _ 5 ×	
					-	
CM - Instru	ument cluster v	vith maintenance in	terval display		-	
CINI LINIKIN	1] - Steering co	lumn module	and the display			
Udio vido	tronic system o, navigation a					
iuuio, viuei	o, navigation a	nd telematics				
						The second second

• After ICM, you will see Control Unit Adaptions :

Control unit	version	ntenance interval disp	nay
Fault codes			
Events			
Actual value	S		
Actuations			
Initial startup			
Control unit			
	t of guided tests		
	ult codes and events		
Control ur			
	ting by means of complain	ts or symptoms	
Service			
Special funct			
Diagnosis to	plant specifications		

From there, pick the year of your model :

•

i Notes on coding:	AJ2005/1 MY2006 (Code 808)
Select the correct model year.	
AJ = Modification year MY = Model year	
See vehicle equipment in FDOK	4
, i shart bolk	
The vehicle modification year cannot be read of	out of vehicle. This results in that every time the menu item is
	out of vehicle. This results in that every time the menu item is
The vehicle modification year cannot be read of	out of vehicle. This results in that every time the menu item is
The vehicle modification year cannot be read of	out of vehicle. This results in that every time the menu item is

From there, pick Special Equipment :

Vehicle 230.479	VIN : WDBSK79F16F116315 Battery voltage: 12.4 Control unit ICM
Special equipment	Control drift perm
Coding	
Interior motion sensor	Current status
DTR Distronic	NOT PRESENT
RDK tire pressure control (Supplier BERU)	NOT PRESENT
Stationary heater	NOT PRESENT
ABC active body control	NOT PRESENT
Keyless Go	NOT PRESENT
New automatic transmission	PRESENT
Folding outside mirrors	AMG variant
Menu item 'Key dependency'	NOT PRESENT
TELE AID	NOT PRESENT
Airbag control module version	PRESENT
	ARMADA

Pick ABC :

•

•

	Control unit ICM
BC active body control	
ABC active body control	NOT PRESENT
i Notes on coding:	
If special equipment 'ABC active body control' (SA code 487) is installed, the coding must be set to 'PRESENT'.
ġ	
	4
ESC F1 F3	FII

- Then go to the drop down tab and change it from PRESENT to NOT PRESENT, and click F3.
- After that, turn off the car, with the doors closed.
- Wait 1-2 mins and start the car back up (no more ABC codes and no white or red lights).

NOTE : the above is is only for R230s (not any W215, W216, W220, W221)
