

Solid Compounds

Menzerna Quality

Consistent high quality is the hallmark of all menzerna products.

Over 100 years experience, profound materials knowledge
and a comprehensive quality management system guarantee perfect
surface quality, short processing times and superior efficiency.

Product Summary

	Formula	Designation	Properties				Application		
			Cut	Gloss	Colour	Greasiness	NF Metals	Stainless Steel	Paint / Plastics
Matting	2002	18 B 6	5	0	grey	very dry	•		
	2003	24 B 6	4	0	grey	very dry	•		
Prepolishing	1015	523 LBZ	5	1	grey	dry	•	•	
	1012	523 BFF	4,5	2	grey	dry	•	•	
	7001	439 T	4	2,5	green	greasy	•	•	
	6008	113 GZ	3	3	brown	dry	•		•
	6171	T 37	3	3	brown	greasy	•		
	12001	18	3	3	yellow	greasy			•
Polishing	7945	P 164	2,5	4	blue	dry	•	•	
	7110	ULTO 11 B	2,5	4	white	dry	•	•	
	7163	P 14 F	2,5	4	white	dry	•	•	
	7006	495 P	2	4	white	greasy		•	
	7013	333	2	5	green	very dry		•	
	7201	P 126	1,5	4,5	rose	very dry	•	•	
	7008	480 W	1,5	4	beige	greasy	•		
	7113	ULTO 15	1,5	4,5	yellow	dry	•		
	12002	16	1	4	amber	dry			•
Finishing	12004	6	1	5	beige	greasy			•
	12006	ATOL 6	1	5	beige	dry			•
	12146	G 52	1	5	white	very dry			•
	7984	P 175	1	5	yellow	dry	•	•	•

Cut/Gloss
1 =low
5 =high

Greasiness in %
greasy > 30%
dry 30% - 27%
very dry < 27%

Solid Compounds

Standard Applications, Polishing Tips

Aluminium/ Brass	Avoid high workpiece temperatures due to high pressure or buffing speed. Do not use coarse sanding papers thus shortening the subsequent polishing process and limiting the heating up of the workpiece. Use greasier compounds for harder and dry compounds for softer alloys.	Aluminium
		Burnishing: 523 BFF
		Prepolishing: 439 T
		Polishing: P164
		Brass
	Recommended buffing speed:	Burnishing: 523 LBZ
	- Aluminium: 50 - 60 m/s	Prepolishing: 113 GZ
	- Brass: 30 - 50 m/s	Polishing: P 14 F
	Security advice:	Finishing: P 175
	Aluminium dust may cause irreversible damage to the lungs. Use effective suction units and personal protective equipment.	
Stainless Steel	Intensified polishing cannot compensate for uneven or too coarse grinding. Uniform and fine grinding not leaving too deep grinding marks, will shorten the polishing process and ensure a deep mirror finish.	Stainless Steel
		Burnishing: 523 LBZ
		Prepolishing: 439 T
		Polishing: 495 P
		Finishing: P 175
	Recommended buffing speed:	
	- Stainless steel: 30 - 35 m/s	
Paint Plastics	Use a two step sanding process ending with grit 600. Sanding marks should be orthogonal to the polishing direction, thus allowing for shorter polishing time and lower pressure. Avoid high surface temperatures.	Paint/Plastics
		Prepolishing: 113 GZ
		Polishing: 16
		Finishing: G 52
	Recommended buffing speed: 6 - 24 m/s	
	The surface of the buff will become harder and less flexible as the speed increases.	
	High pressure and high speed can lead to overheating of the buff.	

Packaging Information

Bars

in mm

Length:	300	400	400	500	500	500	500	500	500	500	500	500	500	500	500
