PARKTRONIC CONTINUOUS WARNING TONE

- Parktronic continuous warning tone -

Topic number	LI54.30-P-066611
Version	3
Function group	54.30 Instrument cluster, display instruments, hazard warning device
Date	10-17-2017
Validity	BR213 and BR238 with SA code 235 (Park Assist) and 464 (All-digital instrument cluster) BR222 with SA code 808 (Facelift), 235 (Park Assist) and 464 (All-digital instrument cluster)
Reason for change	Validity adapted.

Complaint

The Parktronic warning tone sounds continuously from the speaker in the driver footwell.

The tone is not stopped by switching off the ignition.

Cause

Software release in all-digital instrument cluster (widescreen cockpit). The complaint can occur in rare cases when the highest Parktronic warning level is requested.

Remedy

Do not replace any parts. The complaint can be rectified with a software update of the instrument cluster.

For vehicles with **software release E24 and higher** (identifiable in the quick test - see Attachment A - by the **software object number A2229042901**), optimized software for the instrument cluster is available:

- Addon 8135 for DVD 05/17
- Addon 8134 for DVD 07/17
- Addon 8132 for DVD 09/17

For vehicles with **software release E15.X** (identifiable in the quick test - see Attachment B - by the **software object number A2139043800** or **A2139043100**), optimized software for the instrument cluster is available:

- Addon 8415 for DVD 07/17
- Addon 8416 for DVD 09/17

For vehicles with **software release E9.X** (identifiable in the quick test - see Attachment C - by the **software object number A2139042600** or **A2139042000**), you will be notified of the current status in this document with any updates.

As an immediate measure, the tone can still be stopped in the following ways:

- Request the highest Parktronic warning level again:
 1. Drive the vehicle forwards towards an object that Parktronic can detect, until one of the warning segments (in the display) reaches the highest Parktronic warning level (**flashing red at the front**, see video).

2. When the highest warning level has been reached (flashing red at the front), move the vehicle away again.

Important: The vehicle must be moved. An object moving in front of a stationary vehicle will not stop the continuous warning tone.

or

- Connect a diagnostic tester and perform a quick test.

or

- Disconnect the vehicle battery.

File

Einparkvorgang bis letzte Stufe.mp4

Designation

Video on resetting the continuous beep. Slowly approaching an obstacle until the parking indicator reaches the last level (flashing red at the front).

Symptoms

Symptom

Communication/information / Warning and control system / Parking assist / PARKTRONIC / Acoustic warning malfunction / Front left

Communication/information / Warning and control system / Parking assist / PARKTRONIC / Acoustic warning malfunction / Front right

Communication/information / Warning and control system / Parking assist / PARKTRONIC / Acoustic warning malfunction / General

Communication/information / Warning and control system / Parking assist / PARKTRONIC / Acoustic warning malfunction / Operates without obvious cause
